I believe that the E Symposium on Industrial and Systems Engineering (ISE) should promote an integrated learning environment that are academically rigorous through its academic advisory programs that provide mathematics, sciences, and computer science as additional rather than engineering subjects. My initial concept has led to a provision to offer ESE programs where students receive both engineering and engineering and technological studies as mathematics. I believe that I would have the opportunity to expand on the knowledge I was introduced to as a child. I am excited to be able present to that learning system as the E Symposium on Industrial and Systems Engineering through the integration of the academic knowledge and my personal/community service as human and technological resources.
