Globalisation, Ideology and Education Reforms Joseph Zajda,2020-06-17 This book analyses the nexus between ideology the state and education reforms worldwide The research evinces the neo liberal ideological imperatives of current education and policy reforms and illustrates the way these shifts in the relationship between the state and education policy

are affecting current trends in education reforms and schooling around the globe. With this as its focus, the chapters represent hand-picked scholarly research on major discourses in the field of global education reforms. Offering a compendium of the very latest thought on the subject, this book is like the others in the series: a state-of-the-art sourcebook for researchers, practitioners, and policymakers alike. Not only do the chapters offer a timely analysis of current issues shaping education policy research, the work also contains ideas about future directions that education and policy reforms could take. By doing so, it provides a comprehensive view of the diverse and intersecting discourses on globalisation and policy-driven reforms in education. The book draws on recent studies in the areas of globalisation, education reforms, and the role of the state. Respective chapters critically assess the dominant discourses and debates on education and policy reforms. Using diverse comparative education paradigms ranging from critical theory to historical comparative research, they focus on globalisation, ideology, and democracy and examine both the reasons for and outcomes of education reforms and policy change.

Risk Sharing in the Euro Area Georgios Psaroudakis, 2023-01-30 The book offers a horizontal legal analysis on the problematic of risk sharing which arises inevitably in an economic and political integration process such as in the European Union and even more so in the euro area. The question is how the burden of adverse economic developments is spread across the integration area; in this case, the euro area, whether risk is distributed evenly and what risk-sharing mechanisms apply. The book looks at the legal basis and the concrete stage of development of such mechanisms in European law as well as at divergences among national legal orders and practices as a source for risk asymmetries. Individual contributions refer in particular to the areas of banking, capital markets, and unemployment insurance. The point of view adopted in the book is important for everyone who wants to develop a robust understanding of the practical functioning of the complex integration process regulated by EU law.
