Reports of the Department of the Interior for the Fiscal Year Ended June 30 ... United States. Department of the Interior,1920 Annual Report United States. Department of the Interior,1920 Integrating Social and Behavioral Sciences Within the Weather Enterprise National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Division on Earth and Life Studies,Board on Human-Systems Integration,Board on Environmental Change and Society,Board on Atmospheric Sciences and Climate,Committee on Advancing Social and Behavioral Science Research and Application Within the Weather Enterprise,2018-02-05 Our ability to observe and forecast severe weather events has improved markedly over the past few decades Forecasts of snow and ice storms hurricanes and storm surge extreme heat and other severe weather events are made with greater accuracy geographic specificity and lead time to allow people and communities to take appropriate protective measures Yet hazardous weather continues to cause loss of life and result in other preventable social costs There is growing recognition that a host of social and behavioral factors affect how we prepare for observe predict respond to and are impacted by weather hazards For example an individual s response to a severe weather event may depend on their understanding of the forecast prior experience with severe weather concerns about their other family members or property their capacity to take the recommended protective actions and numerous other factors Indeed it is these factors that can determine whether or not a potential hazard becomes an actual disaster Thus it is essential to bring to bear expertise in the social and behavioral sciences SBS including disciplines such as anthropology communication demography economics geography political science psychology and sociology to understand how people s knowledge experiences perceptions and attitudes shape their responses to weather risks and to understand how human cognitive and social dynamics affect the forecast process itself Integrating Social and Behavioral Sciences Within the Weather Enterprise explores and provides guidance on the challenges of integrating social and behavioral sciences within the weather enterprise It assesses current SBS activities describes the potential value of improved integration of SBS and barriers that impede this integration develops a research agenda and identifies infrastructural and institutional arrangements for successfully pursuing SBS weather research and the transfer of relevant findings to operational settings

Encyclopedia of Transportation Mark Garrett,2014-08-13 Viewing transportation through the lens of current social economic and policy aspects this four volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas including geography public policy business and economics The book s articles all written by experts in the field seek to answer such questions as What has been the legacy not just economically but politically

and socially as well of President Eisenhower's modern interstate highway system in America. With that system and the infrastructure that supports it now in a state of decline and decay, what's the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high speed rail that every expert says despite the allure will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features Approximately 675 signed articles authored by prominent scholars are arranged in A to Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context. A Reader's Guide organizes entries by broad topical or thematic areas. A detailed index helps users quickly locate entries of most immediate interest and a Resource Guide provides a list of journals, books, and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full well rounded coverage of the field, the General Editor with expertise in urban planning, public policy, and the environment worked alongside a Consulting Editor with a background in Civil Engineering. The index, Reader's Guide, and cross references combine for thorough search and browse capabilities in the electronic edition. Available in both print and electronic formats. Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

Public Roads, 1927 **Annual Report of the Department of the Interior** United States. Department of the Interior, 1915 **Hearings, Reports and Prints of the House Committee on Interior and Insular Affairs** United States. Congress. House. Committee on Interior and Insular Affairs, 1970 *Interstate Commerce Commission Reports* United States. Interstate Commerce Commission, 1933 **Behavioural Adaptation and Road Safety** Christina Rudin-Brown, Samantha Jamson, 2013-05-24. Despite being an accepted construct in traffic and transport psychology, the precise nature of behavioural adaptation, including its causes and consequences, has not yet been established within the road safety community. A comprehensive collection of recent literature, *Behavioural Adaptation and Road Safety: Theory, Evidence and Action*, explores behavioural adaptation in road users. It examines behavioural adaptation within the context of historical and theoretical perspectives and puts forth tangible and practical solutions that can effectively address adverse behavioural adaptation to road safety interventions before it occurs. Edited by Christina Rudin Brown and Samantha Jamson, with chapters authored by leading road safety experts in driver psychology and behaviour, the book introduces the concept of behavioural adaptation and details its more relevant issues. It reviews the definition of behavioural adaptation that was put forward by the OECD in 1990 and then puts this definition through its paces, identifying where it may be lacking and how it might be improved. This sets the context for the remaining chapters, which take the OECD definition as their starting points. The book discusses the various theories and models of behavioural adaptation and more general theories of driver behaviour developed

during the last half century It provides examples of the evidence for behavioural adaptation instances in which behavioural adaptation arose as a consequence of the introduction of safety countermeasures The book then focuses on the internal human element and considers countermeasures that might be used to limit the development of behavioural adaptation in various road user groups The book concludes with practical tools and methodologies to address behavioural adaptation in research and design and to limit the potential negative effects before they happen Supplying easy to understand accessible solutions that can be implemented early on in a road safety intervention s design or conception phase the chapters represent the most extensive compilation of literature relating to behavioural adaptation and its consequences since the 1990 OECD report The book brings together earlier theories of behavioural adaptation with more recent theories in the area and combines them with practical advice methods and tangible solutions that can minimise the potential negative impact of behavioural adaptation on road user safety and address it before it occurs It is an essential component of any road safety library and should be of particular relevance to researchers practitioners designers and policymakers who are interested in maximizing safety while at the same time encouraging innovation and excellence in road transport related design
