Huber,Cynthia Z. Rawitch,2017-12-15 This book turns the traditional approach to student success on its head

by examining the learning habits of successful students based on what they have told us about their learning strategies on what they do to succeed in college and on the teaching practices they think best foster their learning This approach is in stark contrast to most recent studies of learning at the college level which focus on what students need to do to succeed but are written from the point of view of experts who provide advice to struggling students Learning from the Learners Successful College Students Share Their Effective Learning Habits is based on what expert students tell us about what they as learners do to succeed It is grounded in a 10 year study that rests on a rich qualitative data set that includes open ended survey responses gathered on a term by term basis and in depth interviews during the freshman and junior years with over 700 students of diverse backgrounds Additionally since many students interviewed were the first in their family to attend college and from backgrounds traditionally underserved by higher education the book s insights will be of particular interest to educators elsewhere who are increasingly expected to help similar students succeed Themes include student success academic challenges diversity pedagogy and technology in the classroom No other book on the widely discussed subject of student success relies on such a wealth of quantitative and qualitative data about what works from the point of view of students themselves
