Vaal Application 2015:

Increasing Resilience to Climate Variability and Change Cecilia Tortajada, 2016-08-18 This book highlights the role that both infrastructure and governance play in the context of resilience and adaptation to climate variability and change. Eleven case studies analyze in depth impacts of extreme events in projects basins and regions in the Arid Americas, United States and Mexico, Australia, Brazil, China, Egypt, France, Nepal, Mexico, Pakistan, Turkey, and South Africa. They discuss the importance of infrastructure, mainly reservoirs, in adaptation strategies, how planning and management aspects should improve in response to changing climatic, economic, social, and environmental situations, and what the management, institutional, and financial challenges would be for their implementation. Governance aspects, policies, institutions, and decision making, and technical and knowledge limitations, are a substantial part of the analyses. The case studies argue that reservoirs are essential to build resilience, contributing to adaptation to climate variability and change. However, for them to be effective, they need to be planned and managed within a governance framework that considers long-term perspectives and multi-sector and multi-level actor needs and perspectives.

Additive Manufacturing: Materials, Processes, Quantifications and Applications Jing Zhang, Yeon-Gil Jung, 2018-05-17 Additive Manufacturing: Materials, Processes, Quantifications and Applications is designed to explain the engineering aspects and physical principles of available AM technologies and their most relevant applications. It begins with a review of the recent developments in this technology and then progresses to a discussion of the criteria needed to successfully select an AM technology for the embodiment of a particular design, discussing material compatibility, interfaces, issues, and strength requirements. The book concludes with a review of the applications in various industries, including bio, energy, aerospace, and electronics. This book will be a must-read for those interested in a practical, comprehensive introduction to additive manufacturing, an area with tremendous potential for producing high-value, complex, individually customized parts. As 3D printing technology advances, both in hardware and software, together with reduced materials cost and complexity of creating 3D printed items, these applications are quickly expanding into the mass market. Includes a discussion of the historical development and physical principles of current AM technologies. Exposes readers to the engineering principles for evaluating and quantifying AM technologies. Explores the uses of Additive Manufacturing in various industries, most notably aerospace, medical, energy, and electronics.

Implementing Environmental Constitutionalism Erin Daly, James R. May, 2018-11-08 Constitutions can play a central role in responding to environmental challenges such as pollution, biodiversity loss, lack of drinking water, and climate change. The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights. Such environmental constitutionalism, however, falls short without effective implementation by policymakers, advocates, and jurists. Implementing Environmental Constitutionalism: Current Global Challenges explains and explores this implementation gap. This collection is both broad and deep. While some of the essays analyze crosscutting themes such as climate change and the

need for rule of law that affect the implementation of environmental constitutionalism throughout the world others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively implemented This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment

Ecological Informatics Friedrich Recknagel, William K. Michener, 2017-09-21 This book introduces readers to ecological informatics as an emerging discipline that takes into account the data intensive nature of ecology the valuable information to be found in ecological data and the need to communicate results and inform decisions including those related to research conservation and resource management At its core ecological informatics combines developments in information technology and ecological theory with applications that facilitate ecological research and the dissemination of results to scientists and the public Its conceptual framework links ecological entities genomes organisms populations communities ecosystems landscapes with data management analysis and synthesis and communicates new findings to inform decisions by following the course of a loop In comparison to the 2nd edition published in 2006 the 3rd edition of *Ecological Informatics* has been completely restructured on the basis of the generic conceptual framework provided in Figure 1 It reflects the significant advances in data management analysis and synthesis that have been made over the past 10 years including new remote and in situ sensing techniques the emergence of ecological and environmental observatories novel evolutionary computations for knowledge discovery and forecasting and new approaches to communicating results and informing decisions

Modified Nanomaterials for Environmental Applications Onoyivwe Monday Ama, Suprakas Sinha Ray, Peter Ogbemudia Osifo, 2021-11-16 This book focuses on the electrochemical and nanostructural properties of new photoanode electrolyte combinations used in the development of novel surface modified nanomaterials for environmental applications As water treatment is rapidly becoming a global challenge due to the increasing complexity and number of the various pollutants present the book explores fundamental issues relating to environmental applications of nanomaterials It addresses relevant topics ranging from electrochemical synthesis and characterization to applications of photoanodes in corrosion prevention and biosensors for wastewater treatment Featuring up to date experimental results on nanomaterials for detection of pharmaceuticals and heavy metals in wastewater this contributed volume is useful to electrochemical researchers materials scientists and chemical and civil engineers interested in advanced photoelectrochemical research for environmental applications

South Africa's water governance hydraulic mission (1912-2008) in a WEF-Nexus context Johann W.N. Tempelhoff, 2018-12-01 Geologists physicists and ecologists currently promote the idea of a post Holocene epoch the Anthropocene As a result of constant innovation and modernisation in the fields of engineering natural science management studies and environmental studies

there has been a growing awareness of the intrinsic interaction between humankind and the environment Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere from the smallest pool of water to the earth's atmosphere Comprehensive infrastructure development in water and sanitation the growing trend to seek additional resources in the form of groundwater desalinated seawater and recycled wastewater as well as special attention being given to capturing and preserving rainwater bear evidence of a timely response to climate change population growth and rapid development in many water stressed regions of the world The purpose of the book is to provide a historical overview of the manner in which South Africa's water resources have been governed from a time when the Union of South Africa was formed in 1910 up to 2008 a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa notable for increasing levels of aridity and more erratic rainfall patterns This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country's water governance system since the establishment in 2014 of the Department of Water and Sanitation The focus is on the Water Energy Food nexus a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water energy and food as resources

The Creation of the Boer Identity Wiets Buys, 2024-02-19 The history of the Boer identity is an epic saga The Boer identity emerged in the isolation of an expansive landscape and evolved as a unique cultural entity deeply rooted in the principles of individualism localism independence and freedom The development of the Boer identity is an action packed tale of sacrifice suffering loss victory and resilience that shaped the Boer identity What sets *The Creation of the Boer Identity* apart is that it challenges the traditional perspective which has never focused on the creation and development of the Boer identity It is a comprehensive exploration of the formation of the Boer identity The book has been extensively researched and include information and insights not previously published in history books The book describes correspondence and public statements by key figures discussing specific events of that time adding a personal and historical dimension to the story It not only narrates the events but also provides factual insights behind them This work presents a fresh perspective on the history of the Boers from the viewpoint of the Boer identity **DISCOVER THIS ASTOUNDING CHRONICLE AND WITNESS THE BIRTH OF A NATION THROUGH THE LENS OF ITS TRUE IDENTITY**

Paper-based Diagnostics Kevin J. Land, 2018-12-11 This book explores the status of paper based diagnostic solutions or Microfluidics 2.0 The contributors explore how paper based tests can be widely distributed and utilized by semi skilled personnel how close to commercial applications the technology has become and what is still required to make paper based diagnostics the game changer it can be The technology is examined through the lens of the World Health Organization's ASSURED criteria for low resource countries Affordable Sensitive Specific User friendly Rapid and robust Equipment free and Deliverable to end users Its applications have to include health technology

environmental technology food safety and more This book is appropriate for researchers in these areas as well as those interested in microfluidics and includes chapters dedicated to principles such as theory of flow and surface treatments components such as biomarkers and detection and current methods of manufacturing Discusses how paper based diagnostics can be used in developing countries by comparing current diagnostic tests with the World Health Organization s ASSURED criteria Examines how paper based diagnostics could be integrated with other technologies such as printed electronics and the Internet of Things Outlines how semi skilled personnel across a variety of fields can implement paper based diagnostics

River Basin Management José Simão Antunes Do Carmo, 2021-04-21 This book addresses recent advances in the field of river systems Chapters cover a wide range of topics including artificialization of rivers and banks technical aspects of flood and sediment dynamics physical processes and institutional vulnerabilities watershed management and collaborative governance water quality analysis and protection measures acquisition and measurement of data statistical and econometric procedures adaptation and restoration measures rehabilitation and sustainability of riparian ecosystems and strategies to improve the ecological functions of riparian areas All chapters contribute relevant information and useful content for scientists and other readers interested or concerned about the lack of adequate management actions and implementation of appropriate measures and protections or their ineffectiveness in containing vulnerabilities and ecological sustainability of river systems
