Fees Must Fall Susan Booyesen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements

while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

The Social Impacts of Mine Closure in South Africa Lochner Marais, 2022-09-05. This book investigates the relationship between mining, mine closure and housing policy in post-apartheid South Africa using concepts from new institutional economics and evolutionary governance theory. Mine closures present a major challenge to the mining industry and governments, with this being particularly noticeable in the Global South. This book argues that the dependencies created by the mining industry and mine housing policies while a mine is operational cause serious societal problems when it closes. To demonstrate this, the book applies the concepts of place attachment, asset-based development and social disruption. Conceptually, the book challenges the view that place attachment and asset-based development are the most appropriate and often the only policy responses in mining areas. In South Africa, the mining industry and the government have created comprehensive housing programmes linked to homeownership to promote place attachment, stability and wealth among mine workers. These programmes do not consider the disruption that mine closure might bring. The book challenges the blind application during boom periods of policies which create long-term dependencies that are difficult to manage when a mine closes. This book will be of interest to students and scholars researching the social impacts of mining and the extractive industries, social geography and sustainable development as well as policymakers and practitioners working with mine closure or social impact assessments.
