University on the Border Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university

Doctoral Education in South Africa Nico Cloete, Johann Mouton, 2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously

Africa and Globalization Kelebogile T.

Setiloane, Abdul Karim Bangura, 2020-10-24 This edited volume examines the challenges of globalization in light of the need to revisit and reconceptualize the notion of Pan Africanism The first part of the book examines globalization and Africa's socioeconomic and political development in this century by using the Diopian Pluridisciplinary Methodology This approach is imperative because the challenges faced by Africa vis vis globalization and socioeconomic development are so multiplexed that no single disciplinary approach can adequately analyze them and yield substantive policy recommendations The chapters in the second part analyze the imperatives for Africa's global knowledge production development and economic transformation in the face of the pressures of globalization Part two demonstrates an urgent need for Africa's significant participation in the global knowledge economy in order to meet the continent's modern transformation and development aspirations The final part examines lessons from old and new Pan Africanism and how they can be utilized to deal with the challenges emanating from the forces of modern globalization With its multidisciplinary approach to a wide range of pressing modern issues for the African content this book is essential reading for scholars across the social sciences interested in where Africa is now and where it should go in this increasingly globalized world *Corrupted* Jonathan D Jansen, 2023-02

Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
