Validity And Validation In Social Behavioral And:

Validity and Validation in Social, Behavioral, and Health Sciences Bruno D. Zumbo, Eric K.H. Chan, 2014-09-26 This book combines an overview of validity theory trends in validation practices and a review of standards and guidelines in several international jurisdictions with research synthesis of the validity evidence in different research areas An overview of theory is both useful and timely in view of the increased use of tests and measures for decision making ranking and policy purposes in large scale testing assessment and social indicators and quality of life research Research synthesis is needed to help us assemble critically appraise and integrate the overwhelming volume of research on validity in different contexts Rather than examining whether any given measure is valid the focus is on a critical appraisal of the kinds of validity evidence reported in the published research literature The five sources of validity evidence discussed are content related response processes internal structure associations with other variables and consequences The 15 syntheses included here represent a broad sampling of psychosocial health medical and educational research settings giving us an extensive evidential basis to build upon earlier studies The book concludes with a meta synthesis of the 15 syntheses and a discussion of the current thinking of validation practices by leading experts in the field

Understanding and Investigating Response Processes in Validation Research Bruno D. Zumbo, Anita M. Hubley, 2017-05-23 This volume addresses an urgent need across multiple disciplines to broaden our understanding and use of response processes evidence of test validity It builds on the themes and findings of the volume Validity and Validation in Social Behavioral and Health Sciences Zumbo Chan 2014 with a focus on measurement validity evidence based on response processes Approximately 1000 studies are published each year examining the validity of inferences made from tests and measures in the social behavioural and health sciences The widely accepted Standards for Educational and Psychological Testing 1999 2014 present five sources of evidence for validity content related response processes internal structure relationships with other variables and consequences of testing Many studies focus on internal structure and relationships with other variables sources of evidence which have a long history in validation research known methodologies and numerous exemplars in the literature Far less is understood by test users and researchers conducting validation work about how to think about and apply new and emerging sources of validity evidence This groundbreaking volume is the first to present conceptual models of response processes methodological issues that arise in gathering response processes evidence as well as applications and exemplars for providing response processes evidence in validation work
