promise In this revelatory book economist Daniel Cohen describes how today's postindustrial society is transforming us all into sequences of data that can be manipulated by algorithms from anywhere on the planet As yesterday's assembly line was replaced by working online the leftist protests of the 1960s have given way to angry protests by the populist right Cohen demonstrates how the digital economy creates the same mix of promises and disappointments as the old industrial order and how it revives questions about society that are as relevant to us today as they were to the ancients Brilliant and provocative *The Inglorious Years* discusses what the new digital society holds in store for us and reveals how can we once again regain control of our lives Rescuing the Vulnerable Beate Althammer,Lutz Raphael,Tamara Stazic-Wendt,2016-05-01 In many ways the European welfare state constituted a response to the new forms of social fracture and economic turbulence that were born out of industrialization challenges that were particularly acute for groups whose integration into society seemed the most tenuous Covering a range of national cases this volume explores the relationship of weak social ties to poverty and how ideas about this relationship informed welfare policies in the nineteenth and twentieth centuries By focusing on three representative populations neglected children the homeless and the unemployed it provides a rich comparative consideration of the shifting perceptions representations and lived experiences of social vulnerability in modern Europe **Roland Barthes at the Collège de France** Lucy O'Meara,2012-01-01 Roland Barthes at the Collège de France studies the four lecture courses given by Roland Barthes in Paris between 1977 and 1980 placing Barthes's teaching within institutional intellectual and personal contexts Theoretically wide ranging Lucy O'Meara's account focuses on Barthes's pedagogical style and the insights they provide into his written works including his focus on essayism and fragmentation and the negotiation between singularity and universality Linking Barthes's strategies to broad intellectual influences from Kant and Adorno to Zen and Taoist philosophies O'Meara reassesses Barthes's critical and ethical priorities in the decade before his death highlighting the vitality of his late thought *La sécurité. *Démarches de programmation architecturale* Gérard Pinot, Emmanuel Redoutey, 2022-08-08. La programmation architecturale demeure inconnue ou sous-estimée dans ses fondements, ses apports et ses visées tant elle reste attachée à un document appelé programme alors que tout concourt à l'envisager comme un processus continu et collectif de définition du projet de décisions et d'actions impliquant un grand nombre d'intervenants. En intégrant les enjeux de transition écologique et de participation il s'agit de passer la seule obligation réglementaire laquelle la programmation est souvent associée pour la concevoir comme une démarche stimulante pour les décideurs et les destinataires des espaces de vie ou de travail réaliste mais aussi rassurante dans la mesure où elle contribue à donner du sens à un projet en anticipant la faisabilité et en réduisant les risques et les aléas. En l'abordant de manière multidimensionnelle le maître d'ouvrage qui initie un projet de construction ou de transformation d'un patrimoine existant peut ainsi consolider ses intentions et ses objectifs, garantir sa qualité et s'assurer de la pertinence du service rendu aux usagers. Cet ouvrage propose aux parties prenantes d'un projet l'adoption d'un langage commun leur permettant de travailler ensemble. Il s'adresse aux maîtres d'ouvrage publics et privés, porteurs de projets, assistants, maîtrise d'ouvrage, concepteurs responsables, établissements ainsi qu'aux étudiants qui souhaitent se familiariser avec les démarches de programmation ou s'y former. Il est organisé en 10 chapitres transversaux et interdépendants. Chaque chapitre est composé de deux parties : Fondamentaux et Méthodes et outils. L'ouvrage est complété par 11 cas pratiques présentés comme des récits de programmation qui parcourent un large spectre de projets complexes ou plus modestes : équipements publics, culturels ou universitaires, projets de reconversion bureaux et lieux de travail, habitat participatif, bâtiments mixtes associant des porteurs de projets publics et privés.
