In this novel a small Virginia based company Savivision invents a revolutionary pair of eyeglasses which replaces the smartphone smart watch and earbuds hearing aids The design team has developed an AI based product with twodozen space age functions including heads up displays Several prototypes are developed and given to individuals on a trial basis These eyeglasses use the SAVI voice command to access the Internet and thousands of applications to make wearers smarter than Einstein The Savivision eyeglasses are so powerful they can t be worn by students taking exams or job interviews They play an important role in college enabling liberal arts students to learn technical trades for useful employment in the digital economy Before long the invention makes huge contributions in the fields of engineering transportation medicine manufacturing education and sports A googles version is used by the Navy Seals Savivision can also be worn on a lanyard to avoid the tragedy of a heads down world of billions of smartphones The demand requires a secondary production source in Canada And it gets a terrific boost in sales due to a popular Saturday Night Live monologue In the end it s clear that America has developed another communications product which makes the world smaller smarter hopefully wiser *Battery Management Systems* H.J. Bergveld,W.S. Kruijt,P.H.L Notten,2013-03-09 *Battery Management Systems Design by Modelling* describes the design of Battery Management Systems BMS with the aid of simulation methods The basic tasks of BMS are to ensure optimum use of the energy stored in the battery pack that powers a portable device and to prevent damage inflicted on the battery pack This becomes increasingly important due to the larger power consumption associated with added features to portable devices on the one hand and the demand for longer run times on the other hand In addition to explaining the general principles of BMS tasks such as charging algorithms and State of Charge SoC indication methods the book also covers real life examples of BMS functionality of practical portable devices such as shavers and cellular phones Simulations offer the advantage over measurements that less time is needed to gain knowledge of a battery s behaviour in interaction with other parts in a portable device under a wide variety ofconditions This knowledge can be used to improve the design of a BMS even before a prototype of the portable device has been built The battery is the central part of a BMS and good simulation models that can be used to improve the BMS design were previously unavailable Therefore a large part of the book is devoted to the construction of simulation models for rechargeable batteries With the aid of several illustrations it is shown that design improvements can indeed be realized with the presented battery models Examples include an improved charging algorithm that was elaborated in simulations and verified in practice and a new SoC indication system that was

developed showing promising results The contents of Battery Management Systems Design by Modelling is based on years of research performed at the Philips Research Laboratories The combination of basic and detailed descriptions of battery behaviour both in chemical and electrical terms makes this book truly multidisciplinary It can therefore be read both by people with an electro chemical and an electrical engineering background
