Poor Numbers Morten Jerven, 2013-02-01 One of the most urgent challenges in African economic development is to devise a strategy for improving statistical capacity Reliable statistics including estimates of economic growth rates and per capita income are basic to the operation of governments in developing countries and vital to nongovernmental organizations and other entities that provide financial aid to them Rich countries and international financial institutions such as the World Bank allocate their development resources on the basis of such data The paucity of accurate statistics is not merely a technical problem it has a massive impact on the welfare of citizens in developing countries Where do these statistics originate How accurate are they *Poor Numbers* is the first analysis of the production and use of African economic development statistics Morten Jerven's research shows how the statistical capacities of sub Saharan African economies have fallen into disarray The numbers substantially misstate the actual state of affairs As a result scarce resources are misapplied Development policy does not deliver the benefits expected Policymakers attempts to improve the lot of the citizenry are frustrated Donors have no accurate sense of the impact of the aid they supply Jerven's findings from sub Saharan Africa have far reaching implications for aid and development policy As Jerven notes the current catchphrase in the development community is evidence based policy and scholars are applying increasingly sophisticated econometric methods but no statistical techniques can substitute for partial and unreliable data

Contested Liberations, Transitions and the Crisis in Zimbabwe Oliver Nyambi, 2024-04-02 How and when does culture enter the discourse on liberation transition and crisis in an African post colony such as Zimbabwe In a deeply polarised nation reeling from a difficult transition and an unrelenting economic crisis it is increasingly becoming difficult for the ZANU PF regime to prescribe and enforce its monolithic concept of liberation This book culls from contemporary counter cultures of liberation and transition the state of liberations in Zimbabwe It explores how culture has functioned as a complex

site where rigid state authored liberations are legitimated and naturalised but also where they are negotiated contested and subverted

India Today Stuart Corbridge, John Harriss, Craig Jeffrey, 2013-04-03 Twenty years ago India was still generally thought of as an archetypal developing country home to the largest number of poor people of any country in the world and beset by problems of low economic growth casteism and violent religious conflict Now India is being feted as an economic power house which might well become the second largest economy in the world before the middle of this century Its democratic traditions moreover remain broadly intact How and why has this historic transformation come about And what are its implications for the people of India for Indian society and politics These are the big questions addressed in this book by three scholars who have lived and researched in different parts of India during the period of this great transformation Each of the 13 chapters seeks to answer a particular question When and why did India take off How did a weak state promote audacious reform Is government in India becoming more responsive and to whom Does India have a civil society Does caste still matter Why is India threatened by a Maoist insurgency In addressing these and other pressing questions the authors take full account of vibrant new scholarship that has emerged over the past decade or so both from Indian writers and India specialists and from social scientists who have studied India in a comparative context India Today is a comprehensive and compelling text for students of South Asia political economy development and comparative politics as well as anyone interested in the future of the world s largest democracy
