members The Taste of Place Amy B. Trubek, 2008-05-05 While much has been written about the concept of terroir as it relates to wine this book expands the concept into cuisine and culture more broadly Bringing together stories of people farming cooking and eating the author focuses on a series of examples ranging from shagbark hickory nuts in Wisconsin to wines from northern California **Southwest France** , 2003 Complemented by travel advice maps accommodation listings and site descriptions a collection of essays and articles on the region of southwestern France by noted authors travel writers and journalists is organized thematically under such headings as Current Events Food and Drink and Museums and Monuments Original 15 000 first printing **Nutritionism** Gyorgy Scrinis, 2013-06-18 Popularized by Michael Pollan in his best selling *In Defense of Food* Gyorgy Scrinis's concept of nutritionism refers to the reductive understanding of nutrients as the key indicators of healthy food an approach that has dominated nutrition science dietary advice and food marketing Scrinis argues this ideology has narrowed and in some cases distorted our appreciation of food quality such that even highly processed foods may be perceived as healthful depending on their content of good or bad nutrients Investigating the butter versus margarine debate the battle between low fat low carb and other weight loss diets and the food industry's strategic promotion of nutritionally enhanced foods Scrinis reveals the scientific social and economic factors driving our modern fascination with nutrition Scrinis develops an original framework and terminology for analyzing the characteristics and consequences of nutritionism since the late nineteenth century He begins with the era of quantification in which the idea of protective nutrients caloric reductionism and vitamins curative effects took shape He follows with the era of good and bad nutritionism which set nutricentric dietary guidelines and defined the parameters of unhealthy nutrients and concludes with our current era of functional nutritionism in which the focus has shifted to targeted nutrients superfoods and optimal diets Scrinis's research underscores the critical role of nutrition science and dietary advice in shaping our relationship to food and our bodies and in heightening our nutritional anxieties He ultimately shows how nutritionism has aligned the demands and perceived needs of consumers with the commercial interests of food manufacturers and corporations Scrinis also offers an alternative paradigm for assessing the healthfulness of foods the food quality paradigm that privileges food production and processing quality cultural traditional knowledge and sensual practical experience and promotes less reductive forms of nutrition research and dietary advice The Business of Food Gary Allen, Ken Albala, 2007-10-30 The business of food and drink is for better and worse the business of our nation and our planet and to most consumers how it works remains largely a mystery This encyclopedia takes readers as consumers behind the scenes of the food and drink industries The contributors come from a wide range of fields and the scope of this encyclopedia is broad covering from food companies and brands to the environment health science and technology culture finance and more The more than 150 essay entries also cover those issues that have been and continue to be of perennial importance Historical context is emphasized and the focus is mainly on business in the United States Most entries include Further Reading The frontmatter includes an Alphabetical List of Entries
