Simplified Neutrosophic Exponential Similarity Measures for Evaluation of Smart Port Development Jihong Chen , Kai Xue, Jun Ye, Tiancun Huang, Yan Tian, Chengying Hua, Yuhua Zhu, Smart ports represent the current trend of port development Intelligent operations reduce the daily production cost of ports facilitate efficient production strengthen the risk mitigation ability and comply with the requirements for long term development However a systematic and scientific smart port evaluation method is missing to nail down the evaluation indicators of a smart port and enable accurate evaluation of a port s degree of intelligence This paper analyzes the concept of the smart port establishes a set of smart port evaluation indicator systems and applies a single valued neutrosophic exponential similarity measure to port evaluation to enable quantitative evaluation of port integrity This evaluation method is capable of decision making in the event of incomplete uncertain and inconsistent information during general evaluation opening up a new method for smart port evaluation and acting as a helpful tool for ports to carry out improvements during actual application Smart Moves in Manual Handling Training Manual , 1994 Cost Management in Plastics Processing Robin Kent, 2017-09-29 Cost Management in Plastics Processing Strategies Targets Techniques and Tools Fourth Edition makes readers think about current practices and how to go forward with effective cost management This is a practical workbook that provides a structured approach to reducing costs in plastics processing for all the major plastics shaping processes moulding extrusion forming as well as elsewhere in the company e g in factory services and non manufacturing areas Competition in all manufacturing sectors is increasing and there is continuous pressure to drive costs down and to increase cost management Good cost management improves profits and margins improves management control and opens the door to becoming a world class company The approach throughout this book looks rigorously at where costs are incurred and proposes projects and targets for cost reduction This book is designed to provide a well structured map broken down into simple tasks and achievable goals This book offers a structured approach to the techniques of cost management from how costs are calculated by accountants to the effective use of machines and labor to the minimization of waste It begins by looking at traditional methods of accounting and costing and whether these are helpful or accurate for project management Practical examples of cost management in plastics processing are included together with many useful flow charts and diagrams to illustrate the points under discussion Enables plastics

processors to institute an effective cost management system going beyond simply trying to cut costs Provides a holistic perspective on cost management shining a light on areas on costs which may not have previously been considered or accounted for and proposing projects and targets for cost reduction Serves as a route map to help companies move toward improved margins and greater profitability

Mastering Efficient Memory Management in C++: Unlock the Secrets of Expert-Level Skills Larry Jones,2025-02-27 Unlock the full potential of your C programming prowess with Mastering Efficient Memory Management in C Unlock the Secrets of Expert Level Skills This comprehensive guide delves into the intricate world of memory management offering seasoned developers a deep dive into advanced techniques and strategies essential for creating high performance resource efficient applications Each meticulously crafted chapter provides a detailed exploration of critical topics from understanding memory models and architecture to mastering the complexities of smart pointers ensuring your software solutions remain robust scalable and optimal As modern applications grow in complexity the need for sophisticated memory management becomes imperative This book equips you with the knowledge necessary to identify and solve memory related challenges effectively with chapters dedicated to dynamic memory techniques memory allocation strategies and optimizing data structures for efficiency You ll gain proficiency in detecting and debugging memory leaks ensuring your applications are both secure and stable Furthermore with insights into cache optimization and managing concurrency you ll be able to fine tune your programs capitalizing on the intricacies of modern processor designs Mastering Efficient Memory Management in C is not just a technical manual it s an essential resource for any developer aiming to excel in C programming With expert tips and practical guidance this book enhances your understanding and application of advanced memory management techniques Whether integrating these strategies into new projects or refining existing ones you are empowered with the skills to elevate your software development practice ensuring every line of code is crafted with precision and efficiency

Intelligent Vehicles and Materials Transportation in the Manufacturing Sector: Emerging Research and Opportunities Bandyopadhyay, Susmita,2017-07-12 The manufacturing industry has been optimized in recent years due to the rise of new technologies These advances have paved the way for the development of intelligent vehicles Intelligent Vehicles and Materials Transportation in the Manufacturing Sector Emerging Research and Opportunities is a pivotal source of scholarly research on the various aspects of manufacturing vehicles with intelligent technology components Including a range of perspectives on topics such as material handling automated guided vehicles and industrial robots this book is ideally designed for engineers academics professionals and practitioners actively involved in the manufacturing sector

Army ,1984 **Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements** Xueyan Liu,Kumar Anupam,Sandra Erkens,Lijun Sun,Jianming Ling,2021-12-24 Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements contains 124 papers from 14 different countries which were presented at the 5th International Symposium on Frontiers of Road and Airport Engineering IFRAE 2021 Delft the Netherlands 12 14 July 2021 The

contributions focus on research in the areas of Circular Sustainable and Smart Airport and Highway Pavement and collects the state of the art and state of practice areas of long life and circular materials for sustainable cost effective smart airport and highway pavement design and construction The main areas covered by the book include Green and sustainable pavement materials Recycling technology Warm cold mix asphalt materials Functional pavement design Self healing pavement materials Eco efficiency pavement materials Pavement preservation maintenance and rehabilitation Smart pavement materials and structures Safety technology for smart roads Pavement monitoring and big data analysis Role of transportation engineering in future pavements Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements aims at researchers practitioners and administrators interested in new materials and innovative technologies for achieving sustainable and renewable pavement materials and design methods and for those involved or working in the broader field of pavement engineering

Intelligent Buildings: An Introduction Derek Clements-Croome, 2013-10-08 This book introduces the concept of Intelligent Buildings to the wider construction community Edited by the Father of Intelligent Buildings Derek Clements Croome the book explains that intelligent buildings should be sustainable healthy technologically aware meet the needs of occupants and business and should be flexible and adaptable to deal with change This means the processes of planning design construction commissioning and facilities management including post occupancy evaluation are all important Buildings comprise many systems devised by many people and yet the relationship between buildings and people can only work satisfactorily if there is an integrated team with a holistic vision

Smart Materials for Tissue Engineering Qun Wang, 2017-05-03 In the last couple of decades research in the area of tissue engineering has witnessed tremendous progress The focus has been on replacing or facilitating the regeneration of damaged or diseased cell tissue or organs by applying a biomaterial support system and a combination of cells and bioactive molecules In addition new smart materials have been developed which provide opportunities to fabricate characterize and utilize materials systematically to control cell behaviours and tissue formation by biomimetic topography that closely replicate the natural extracellular matrix Following on from Smart Materials for Tissue Engineering Fundamental Principles this book comprehensively covers the different uses of smart materials in tissues engineering providing a valuable resource for biochemists materials scientists and biomedical engineers working in industry and academia

Rethink! Prototyping Christoph Gengnagel, Emilia Nagy, Rainer Stark, 2015-11-18 In this book the authors describe the findings derived from interaction and cooperation between scientific actors employing diverse practices They reflect on distinct prototyping concepts and examine the transformation of development culture in their fusion to hybrid approaches and solutions The products of tomorrow are going to be multifunctional interactive systems and already are to some degree today Collaboration across multiple disciplines is the only way to grasp their complexity in design concepts This underscores the importance of reconsidering the prototyping process for the development of these systems particularly in transdisciplinary research teams Rethinking Prototyping new hybrid concepts for prototyping was a transdisciplinary project that took up this challenge The aim of this programmatic rethinking was to come up with a general concept of prototyping by combining innovative prototyping concepts which had been researched and developed in three sub projects Hybrid Prototyping developed new prototyping approaches to validate and

evaluate holistically developed systems with their services infrastructure and business models Blended Prototyping addressed a new technique whereby prototypes for user interfaces of software applications can be generated from hand drawings and immediately be tested Beyond Prototyping examined the issue of the prototype in connection with algorithmically generated design for producing tailor made products Intelligent Infrastructure Nastaran Dadashi,David Golightly,Sarah Sharples,Richard Bye,2023-07-30 With the development of sensor technology wireless communications big data and machine learning there is an increasing interest in technologies and solutions that assess and predict the state of equipment and assets within various industrial settings These technologies aim to collect information from multiple sources about infrastructure asset status Then through current and historical data analysis this configuration of technologies delivers intelligence on current and future asset status to a maintenance operator or manager to inform optimal maintenance decision making These technologies are known under different terms remote condition monitoring e maintenance prognostic systems predictive maintenance and smart or intelligent infrastructure Despite the promise of remote condition monitoring and predictive technologies there is a growing concern with such technologies because they can be difficult or impractical to use Understanding and mitigating potential human factors issues could ensure that such vast investments are not wasted This book considers in depth the challenges placed on users of current and future condition monitoring systems Its primary focus is to understand the cognitive processes including managing alarms interpreting data and collaborating with automation The book describes a range of human factors methods that can be used to understand the current and future functioning of people and technology in an enhanced maintenance and asset monitoring context The book also presents a framework for describing these issues systematically and presents the resulting design considerations to increase the effectiveness of individual operators and organisations as a whole **Trust-Based Communication Systems for Internet of Things Applications**

Prateek Agrawal,Vishu Madaan,Anand Sharma,Dilip Kumar Sharma,Akshat Agrawal,Sandeep Kautish,2022-06-17 TRUST BASED COMMUNICATION SYSTEMS FOR INTERNET OF THINGS APPLICATIONS Highlighting the challenges and difficulties in implementing trust based communication systems for Internet of Things IoT services and applications this innovative new volume is a critical reference source for academics professionals engineers technology designers analysts and students The primary objective of this edited book is to deliver technologies to improve trust and eliminate malicious actors in participatory exchanges throughout communication using Internet of Things IOT devices such that these methods should not only be able to identify bad actors but also to improve communication and trust in the environment without violating object privacy Whether as a reference for the engineer or scientist or a textbook for the student this is a must have for any library Advanced Technologies and the Management of Disruptive Supply Chains Hassan Qudrat-Ullah,Syed Imran Ali,2023-11-21 The book explores cost effective and efficient supply chain management to achieve resilience in the post COVID environment Qualitative quantitative case studies and systematic literature reviews are

made in the book The book follows a didactic approach through which it informs global researchers and practitioners to deal with the most significant insights on future supply chains with a more in depth analysis of post COVID opportunities and challenges In particular this book provides an in depth assessment of disruptive supply chain management in certain industrial contexts and explores various Industry 4 0 and Industry 5 0 technologies to achieve resilience The book is used as a supplemental textbook for study within university level programs at late undergraduate and graduate levels in faculties of business and management engineering systems information systems education and computing

An Interdisciplinary Approach to Modern Network Security Sabyasachi Pramanik, Anand Sharma, Surbhi Bhatia, Dac-Nhuong Le, 2022-05-02 An Interdisciplinary Approach to Modern Network Security presents the latest methodologies and trends in detecting and preventing network threats Investigating the potential of current and emerging security technologies this publication is an all inclusive reference source for academicians researchers students professionals practitioners network analysts and technology specialists interested in the simulation and application of computer network protection It presents theoretical frameworks and the latest research findings in network security technologies while analyzing malicious threats which can compromise network integrity It discusses the security and optimization of computer networks for use in a variety of disciplines and fields Touching on such matters as mobile and VPN security IP spoofing and intrusion detection this edited collection emboldens the efforts of researchers academics and network administrators working in both the public and private sectors This edited compilation includes chapters covering topics such as attacks and countermeasures mobile wireless networking intrusion detection systems next generation firewalls web security and much more Information and communication systems are an essential component of our society forcing us to become dependent on these infrastructures At the same time these systems are undergoing a convergence and interconnection process that has its benefits but also raises specific threats to user interests Citizens and organizations must feel safe when using cyberspace facilities in order to benefit from its advantages This book is interdisciplinary in the sense that it covers a wide range of topics like network security threats attacks tools and procedures to mitigate the effects of malware and common network attacks network security architecture and deep learning methods of intrusion detection

Communication and Intelligent Systems Harish Sharma, Vivek Shrivastava, Kusum Kumari Bharti, Lipo Wang, 2023-07-24 This book gathers selected research papers presented at the Fourth International Conference on Communication and Intelligent Systems ICCIS 2022 organized by National institute of Technology Delhi India during December 19 20 2022 This book presents a collection of state of the art research work involving cutting edge technologies for communication and intelligent systems Over the past few years advances in artificial intelligence and machine learning have sparked new research efforts around the globe which explore novel ways of developing intelligent systems and smart communication technologies The book presents single and multi disciplinary research on these themes in order to make the latest results available in a single readily accessible source The

book is presented in two volumes

The Enigmatic Realm of **Smart Manual Handling**: Unleashing the Language is Inner Magic
