Disability, Intersectionality, and Belonging in Special Education Elizabeth A. Harkins Monaco, L. Lynn Stansberry Brusnahan, Marcus C. Fuller, Martin O. Odima Jr., 2024-02-23 *Disability Intersectionality and Belonging in Special Education* focuses on preparing educators who use socioculturally sustaining practices curricula and instruction through an intersectional lens This book empowers preservice students and special education practitioners and administrators to meet the needs of disabled individuals Understanding the full range of requirements relating to socioculturally sustaining practices is imperative to working with individuals with disabilities as well as with their families and caregivers Being able to understand and explain this complex issue to others is important and often necessary Social injustices in special education are historical and systemic Special education practitioners are typically unaware of the importance of intersectional differences because they have been prepared to address cultural perspectives only during awareness days or through specific units in curricula At other times they discuss the topic diagnostically for example as part of an educational plan or when teaching English as a second language Other issues stem from the value system of the special education practitioners themselves some are not willing to engage in these concepts while others prioritize treating all students the same by using the terms fairness equity and colorblindness to justify this treatment Even when special educator practitioners attempt to address injustices on behalf of their students they tend to center on only the student's disability which means they are ignoring or erasing other aspects of their students' identities These concerns highlight the importance of building the sociocultural competence of our teaching force This book will help practitioners build this competence in their own spheres of influence

governments can develop a digital government strategy for creating public value how to finance digital innovation in the public sector how to building successful collaboration networks and foster citizen engagement and how to correctly implement open government projects and open data It will be of interest to researchers practitioners students and public sector IT professionals that work in the design and implementation of technology based projects and programs

Hate Crimes Barbara Krasner, 2017-07-15 Few would argue that a violent attack motivated by negative feelings towards the victim's race ethnicity religion or sexual orientation is a hate crime But should a hate motivated crime be punished differently than the same crime committed for a different motive What if the crime is verbal a slur or a ranting blog post or a graffiti scrawl These may be hateful but are they hate crimes And how should they be punished Are hate crimes on the rise or are media attention and greater sensitivity to the issue making it appear so These and other questions are at the center of this thought provoking collection of articles drawn from across the political spectrum and the globe
