Cybersecurity in Smart Homes Rida Khatoun,2022-08-23 Smart homes use Internet connected devices artificial intelligence protocols and numerous technologies to enable people to remotely monitor their home as well as manage various systems within it via the Internet using a smartphone or a computer A smart home is programmed to act autonomously to improve comfort levels save energy and potentially ensure safety the result is a better way of life Innovative solutions continue to be developed by researchers and engineers and thus smart home technologies are constantly evolving By the same token cybercrime is also becoming more prevalent Indeed a smart home system is made up of connected devices that cybercriminals can infiltrate to access private information commit cyber vandalism or infect devices using botnets This book addresses cyber attacks such as sniffing port scanning address spoofing session hijacking ransomware and denial of service It presents analyzes and discusses the various aspects of cybersecurity as well as solutions proposed by the research community to counter the risks Cybersecurity in Smart Homes is intended for people who wish to understand the architectures protocols and different technologies used in smart homes *Transactions on Large-Scale Data- and Knowledge-Centered Systems LVII* Abdelkader Hameurlain,A Min Tjoa,2024-10-24 The LNCS journal Transactions on Large

scale Data and Knowledge centered Systems focuses on data management knowledge discovery and knowledge processing which are core and hot topics in computer science. Since the 1990s the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing e.g. computing resources, services, metadata, data sources across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability. This the 57th issue of Transactions on Large scale Data and Knowledge centered Systems contains five fully revised selected regular papers. Topics covered include leveraging machine learning for effective data management, access control models, reciprocal authorizations, Internet of Things, digital forensics, code similarity search, volunteered geographic information and spatial data quality.
