5G NR Modelling in MATLAB Tulsi Pawan Fowdur, Madhavsingh Indoonundon, Dragorad A. Milovanovic, Zoran S. Bojkovic, 2024-06-30 5G is the fifth generation of wireless technology and NR stands for a new radio interface and radio access technology for cellular networks i.e. a physical connection method for radio based communication. It is a powerful platform that supports a wide range of services that includes enhanced mobile broadband, massive machine type communication, and ultra-reliability and low latency covering several vertical industries such as e-health, transportation, energy, media, and factories automation. This book provides a detailed description of the fundamental aspects of 5G. It gives an in-depth coverage of the network architecture of 5G by considering both the network reference point architecture and the service-based architecture. It also describes all the user and control plane protocols including the standalone and non-standalone architecture options. The radio access technologies such as the waveforms used in 5G, the multi-access and duplexing techniques, as well as the resource allocation schemes, are treated in detail. Additionally, the physical layer signal processing blocks of 5G NR are covered in depth with elaborate numerical examples to illustrate the functioning of each block in the 5G downlink transmitter and receiver chain. The main originality of this book is the detailed illustration of the 5G NR pre-processing steps as well as Matlab simulation models with explanation on the codes to allow for a seamless understanding of the principles. In general, this book is meant for anyone with a basic engineering background who would be interested to acquire a solid foundation in the fundamental concepts of 5G NR. Intelligent Circuits and Systems for SDG 3 – Good Health and well-being Bhaveshkumar Choithram Dharman, Suman Lata Tripathi, 2024-08-05 ICICS is a series of conferences initiated by School of Electronics and Electrical Engineering at Lovely Professional University. Looking at the response to the conference, the bi-annual conference now onwards will be annual. The 5th International Conference on Intelligent Circuits and Systems ICICS 2023 will be focusing on intelligent circuits and systems for achieving the targets in Sustainable Development Goal SDG 3 identified as Good Health and Wellbeing by United Nations. Psychotherapy in the Third Millennium - Cross-Cutting Themes and Proposals for Reflection Federico Durbano,Floriana Irtelli,Barbara Marchesi,2025-04-16 This book explores the complex and diverse issues of psychotherapy with a specific focus on peculiar aspects common to all approaches despite the vast number of therapeutic schools that have

emerged over time more than 250 worldwide While each approach can be traced back to a handful of core psychological models such as cognitive psychology psychoanalysis humanism and behaviorism many schools have developed their own unique variations based on individual insights or the need to address specific psychological issues The rise of eclectic approaches further complicates the field often favoring practical convenience over strong theoretical or clinical foundations The book highlights a major issue by presenting chapters that explore various aspects of the psychotherapeutic approach It covers broad cross cutting themes such as psychedelic assisted therapy common relational dynamics in psychotherapy and the influence of clients mental models on treatment outcomes The second section will focus on specific clinical issues eating disorders in Western societies and intervention models applied in complex organizational settings Rather than adopting a rigid verificationist approach to validate theoretical models the book presents diverse practical considerations from professionals in the field encouraging readers to critically evaluate the effectiveness of different therapeutic models
