Asymmetric Killing Neil C. Renic, 2020-04-30 This book offers an engaging and historically informed account of the moral challenge of radically asymmetric violence warfare conducted by one party in the near complete absence of physical risk across the full scope of a conflict zone What role does physical risk and material threat play in the justifications for killing in war And crucially is there a point at which battlefield violence becomes so one directional as to undermine the moral basis for its use In order to answers these questions Asymmetric Killing delves into the morally contested terrain of the warrior ethos and Just War Tradition locating the historical and contemporary role of reciprocal risk within both This book also engages two historical episodes of battlefield asymmetry military sniping and manned aerial bombing Both modes of violence generated an imbalance of risk between opponents so profound as to call into question their permissibility These now resolved controversies will then be contrasted with the UAV exclusive violence of the United States robotic killing conducted in the absence of a significant military ground presence in conflict theatres such as Pakistan Yemen and Somalia As will be revealed the radical asymmetry of this latter case is distinct undermining reciprocal risk at the structural level of war Beyond its more resolvable tension with the warrior

ethos UAV exclusive violence represents a fundamental challenge to the very coherence of the moral justifications for killing in war

The Greatest Lie on Earth Edward Hendrie, 2016-01-17 This book reveals the mother of all conspiracies It sets forth biblical proof and irrefutable evidence that will cause the scales to fall from your eyes and reveal that the world you thought existed is a myth The most universally accepted scientific belief today is that the earth is a globe spinning on its axis at a speed of approximately 1 000 miles per hour at the equator while at the same time it is orbiting the sun at approximately 66 600 miles per hour All of this is happening as the sun in turn is supposed to be hurtling through the Milky Way galaxy at approximately 500 000 miles per hour The Milky Way galaxy itself is alleged to be racing through space at a speed ranging from 300 000 to 1 340 000 miles per hour What most people are not told is that the purported spinning orbiting and speeding through space has never been proven In fact every scientific experiment that has ever been performed to determine the motion of the earth has proven that the earth is stationary Yet textbooks ignore the scientific proof that contradicts the myth of a spinning and orbiting globe Christian schools have been hoodwinked into teaching heliocentrism despite the clear teaching in the bible that the earth is not a sphere and does not move This book reveals the evil forces behind the heliocentric deception and why scientists and the Christian churches have gone along with it

Smith, Clarence R. Geier, 2019-06-25 Essays that explore the growing field of conflict archaeology Within the last twenty years the archaeology of conflict has emerged as a valuable subdiscipline within anthropology contributing greatly to our knowledge and understanding of human conflict on a global scale Although archaeologists have clearly demonstrated their utility in the study of large scale battles and sites of conventional warfare such as camps and forts conflicts involving asymmetric guerilla or irregular warfare are largely missing from the historical record *Partisans Guerillas and Irregulars Historical Archaeology of Asymmetric Warfare* presents recent examples of how historical archaeology can contribute to a better understanding of asymmetric warfare The volume introduces readers to this growing study and to its historic importance Contributors illustrate how the wide range of traditional and new methods and techniques of historiography and archaeology can be applied to expose critical actions sacrifices and accomplishments of competing groups representing opposing philosophies and ways of life which are otherwise lost in time The case studies offered cover significant events in American and world history including the French and Indian War the American Revolution Indian wars in the Southeast and Southwest the Civil War Reconstruction

Prohibition and World War II All such examples used here took place at a local or regional level and several were singular events within a much larger and more complex historic movement While retained in local memory or tradition and despite their potential importance they are poorly and incompletely addressed in the historic record Furthermore these conflicts took place between groups of significantly different cultural and military traditions and capabilities most taking on a David vs Goliath character further shaping the definition of asymmetric warfare Special Warfare ,2015 The Fundamentals of Physical Surveillance (3rd Ed.)
