Brautigam, 2015-10-07 In this clear-eyed and incisive book one of the world's leading authorities on China's relationship with Africa exposes the myths and realities of the so-called Chinese land grab *Sanctions with Chinese Characteristics* Angela Poh, 2025-10-01 The view that China has become increasingly assertive under President Xi Jinping is now a common trope in academic and media discourse However until the end of Xi Jinping's first term in March 2018 China had been relatively restrained in its use of coercive economic measures This is puzzling given the conventional belief among scholars and practitioners that sanctions are a middle ground between diplomatic and military paramilitary action Using a wide range of methods and data including in-depth interviews with 76 current and former politicians policy makers diplomats and commercial actors across 12 countries and 16 cities *Sanctions with Chinese Characteristics Rhetoric and Restraint in China's Diplomacy* examines the ways in which China had employed economic sanctions to further its political objectives and the factors explaining China's behaviour This book provides a systematic investigation into the ways in which Chinese decisionmakers approached sanctions both at the United Nations Security Council and unilaterally and shows how China's longstanding sanctions rhetoric has had a constraining effect on its behaviour resulting in its inability to employ sanctions in complete alignment with its immediate interests *Language Matters in Contemporary Zimbabwe* Collen Sabao, Esther Mavengano, 2024-06-17 Speaking to a broader global preoccupation with the state of languages and language development this book considers issues surrounding the diverse languages linguistic communities and cultures of Zimbabwe Reflecting on Shona Xitsonga Sotho Xhosa Tjwao Nambya IsiNdebele Nyanja Tshivenda English and Braille the book uncovers both the internal and external factors that impact language structures language use and language ideologies across the country The book considers how colonial legacies and contemporary language domination and minoritisation have led to language endangerment It considers the fate of communities whose languages are marginalised and in the process poses questions on what can and should be done to preserve Zimbabwean languages The authors' offerings range across subjects as diverse as

music linguistic innovation education human rights literature language politics and language policy in order to build a rich and nuanced picture of language matters in the country Coming at a critical moment of increasing mobility migration cultural plurality and globalisation this book will be an important resource for researchers across African literature linguistics communication policy and politics

Natural Resource Conflicts M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out

Blood Oil Leif Wenar, 2015-12-02 Natural resources like oil and minerals are the largest source of unaccountable power in the world Petrocrats like Putin and the Saudis spend resource money on weapons and oppression militants in Iraq and in the Congo spend resource money on radicalization and ammunition Resource fueled authoritarians and extremists present endless crises to the West and the source of their resource power is ultimately ordinary consumers doing their everyday shopping at the gas station and the mall In this sweeping new book one of today's leading political philosophers Leif Wenar goes behind the headlines in search of the hidden global rule that thwarts democracy and development and that puts shoppers into business with some of today's most dangerous men Wenar discovers a rule that once licensed the slave trade and apartheid and genocide a rule whose abolition has marked some of humanity's greatest triumphs yet a rule that still enflames tyranny and war and terrorism through today's multi trillion dollar resource trade Blood Oil shows how the West can now lead a peaceful revolution by ending its dependence on authoritarian oil and by getting consumers out of business with the men of blood The book describes practical strategies for upgrading world trade for choosing new rules that will make us more secure at home more trusted abroad and better able to solve pressing global problems like climate change Blood Oil shows citizens consumers and leaders how we can act together today to create a more united human future

Indian Air Force X & Y Group | 30 Practice Sets and Solved Papers Book for 2021 Exam | with Latest Pattern and Detailed Explanation | by Rama Publishers Rama Publishers, 2021-06-21 Book Type Practice Sets Solved Papers The Indian Air Force is recruiting airmen for Group X online test physical fitness test and medical examination Unmarried Male Candidates with relevant educational qualifications and medical standards are eligible Exam Pattern Indian Air Force Airmen Group X and Y trade Online test will be objective type and questions will be bilingual English Hindi except for English paper The online examination will be multiple choice questions related to English and Reasoning and General Awareness RAGA subjects The online examination is the first stage of the selection process for the Air Force Group Y Recruitment 2021 Candidates will be attempting a total of 50 questions The exam will consist of multiple choice questions related to English reasoning and general awareness There is a negative marking 0 25 mark for every incorrect answer attempted in Air force X and Y group exam Negative Marking 0 25 Conducting Body Indian Air Force Mining Africa Warikandwa, Tapiwa V., 2017-05-01 This book is a pacesetter in matters of mining and the environment in Africa from multidisciplinary and spatio temporal perspectives The book approaches mining from the perspectives of law politics archaeology anthropology African studies geography human ecology sociology history economics and development It interrogates mining and environment from the perspectives of customary law as well as from the perspectives of Euro modern laws In this sense the book straddles precolonial colonial and postcolonial mining and environmental perspectives In all this it maintains a Pan Africanist perspective that also speaks to contemporary debates on African Renaissance and to the unity of Africa From scrutinising the lived realities of African miners who are often insensitively and unjustly addressed as illegal miners the book also interrogates transnational mining corporations matters of corporate social responsibility as well as matters of tax evasions by transnational corporations whose commitment to accountability to African governments is questioned With both theoretical chapters and chapter based on empirical studies on mining and the environment across the African continent the book provides a much needed holistic one stop shop for scholars activists researchers and policy makers who need a comprehensive treatise on African mining and the environment The book comes at the right time when matters of African mining and environment are increasingly coming to the fore in the light of discourses about the new 21st century scramble for African resources in which big transnational corporations and nations are jostling to suck Africa dry in their race to control planetary resources It is a book that speaks to contemporary broader issues of de coloniality and transformation of African minds and African environmental resources **The Rhodesian Air Force in Zimbabwe's War of Liberation, 1966-1980** Darlington Mutanda, 2016-11-10 This book evaluates the development of the Rhodesian Air Force during the Second Chimurenga or Bush War 1966 1980 Airpower in irregular conflict is effective at the tactical level because guerrilla warfare is not a purely military conflict The Rhodesian Air Force was deployed in a war winning versus a supporting role as a result of the shortage of manpower to deal with insurgency and almost all units of the Rhodesian Security Forces depended

on its tactical effectiveness Technical challenges faced by the Air Force combined with the rate of guerrilla infiltration and the misuse of airpower to bomb guerrilla bases in neighboring countries largely negated the success of airpower *Just Security in an Undergoverned World* William Durch, Joris Larik, Richard Ponzio, 2018-01-19 *Just Security in an Undergoverned World* examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance

Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century Edward Shizha, Ngoni Makuvaza, 2017-04-17 What have postcolonial Sub Saharan African countries achieved in their education policies and programmes How far have they contributed to successful attainment of the targeted 2015 Millennium Development Goals MDGs on education What were the constraints and barriers for developing an education system that appeals to the needs of the sub region *Re thinking Postcolonial Education in Sub Saharan Africa in the 21st Century* Post Millennium Development Goals is an attempt to demonstrate that Sub Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people To that end the contributors are academics with an African vision attempting to come up with African home grown perspectives to fill the gap created by the lapse of the MDGs as the guiding vision and framework for educational provision in Africa and beyond The book seeks to articulate and address African issues from an informed as well as objective African perspective The book is also intended to provide insights to scholars who are interested in studying and understanding the nature of postcolonial education in the Sub Saharan African region Given the objectives and themes of this book it is intended for academic scholars undergraduate and graduate students human rights scholars curriculum developers college and university academics teachers education policy makers international organisations and local and international non governmental organisations that are interested in African

education policies and programmes Rethinking Postcolonial Education in Sub Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and re positions the issue of education at the forefront of the debates on African development Lamine Diallo Associate Professor Wilfrid Laurier University Canada The book is a welcome addition to discourses and analyses on education in sub Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa Michael Tonderai Kariwo PhD Instructor and Research Fellow University of Alberta Canada *Reimagining God and Resacralisation* Alexa Blonner, 2019-05-14 This book shows that widespread resacralisation has been taking place which is producing new ways of perceiving God and the divine The last century has seen unmistakable changes in religious practices and the concept of spirituality right across the world There was a broad expectation for much of the twentieth century that religious worldviews would eventually succumb to the challenge of secularist materialism but this process of secularisation has yet to occur as predicted The book begins by contrasting theories of secularisation and resacralisation Throughout the book conceptual threads or new religious themes related to this resacralisation are discussed in terms of three main categories reimagining God's nature substance and location reimagining human value and purpose and reimagining modes of redemption Finally the book considers how these threads are moving in various different directions and what the religious future might hold This is a bold examination of contemporary spirituality that will appeal to academics and scholars of religious studies new religious movements and the sociology of religion The Cost of Free Money Paola Subacchi, 2020-09-15 A penetrating account of how unchecked capital mobility is damaging international cooperation polarizing the economic landscape and ultimately reshaping the global order When it comes to the afflictions of the global economy almost everyone and especially Donald Trump is quick to point the finger of blame at the state of international trade But what about unconstrained capital flows Unfettered capital has resulted in a string of financial and economic crises that have left our political systems strained and dialogue corroded The once perceived benefits of openness have been cast to the wayside and the cracks in the global order can no longer be ignored Paola Subacchi argues that international cooperation and interdependence have become crippled Regional restrictions will soon strengthen and a multipolar order will take shape leading to a distinctly transformed economic landscape in which China challenges the dominance of the US dollar Combining history analysis and prediction this book provides penetrating insight into the challenges facing the international economic order **Diplomatic Interference and the Law** Paul Behrens, 2016-05-05 Diplomatic interference carries considerable potential for disruption In this context diplomats have been accused of insulting behaviour the funding of political parties incitement to terrorism and even attempts to topple the host government Reactions can be harsh expulsions are common and occasionally diplomatic relations are severed altogether But an evaluation under international law faces challenges Often enough charges of interference are made when legitimate interests are involved for instance when diplomats criticise the human rights record of their hosts In such cases diplomats may be able to invoke

grounds which are recognised under international law On the basis of more than 300 cases of alleged diplomatic interference and the practice of about 100 States and territories *Diplomatic Interference and the Law* provides an examination of the main areas in which charges of meddling have arisen such as lobbying activities contacts with the opposition propaganda the use of threats and insults and the granting of asylum It analyses situations in which the sovereignty of the receiving State meets competing interests and offers solutions which avoid a conflict of norms It concludes with useful advice for foreign offices and diplomatic agents and underlines the most efficient ways of dealing with situations of alleged interference A book that is here to stay It is essential reading for diplomats academics journalists students and everyone who has an interest in international law and justice Based on rigorous research Paul Behrens book offers new and thoughtful perspectives on the Vienna Convention on Diplomatic Relations which we drafted in 1961 It demonstrates just how important it is to have a lawyer of his impartiality and integrity if we want to reach peaceful and lasting solutions in international relations *Diplomatic Interference and the Law* has the makings of an instant classic and I have no doubt that it will pave the way for the sorely needed reform of diplomatic law Dr Nelson Iri iz Cas s Vice President of the Committee of the Whole of the Vienna Conference on Diplomatic Relations in 1961 former Head of the diplomatic missions of Uruguay to Austria Czechoslovakia Hong Kong Denmark and Sweden author of *Corrupci n en la ONU* Dr Behrens s book rigorously analyses the legal doctrine of non interference by diplomats in their hosts internal affairs and how it may conflict with legal obligations to combat for example denial of self determination and breaches of human rights Exhaustively researched and in accessible language with copious often entertaining examples it will be an indispensable guide for diplomats Behrens on diplomatic interference will be cited as the definitive authority on the matter for the foreseeable future I recommend this book to diplomats lawyers and the general reader they will all read and refer to it with profit and immense pleasure Sir Brian Barder KCMG BA Cantab is a former British ambassador to Ethiopia Bnin and Poland and High Commissioner to Nigeria and Australia Paul Behrens book breaks new ground It is the first study to focus on the vexed question of diplomatic meddling in the domestic affairs of the receiving State It has heightened topicality as many Western governments in their concern to promote human rights and democracy urge their diplomats to be active in their support of civil society particularly in countries with authoritarian governments This book is replete with case studies covering the 50 years since the signature of the Vienna Convention and provides an invaluable pathway through this legal minefield Sir Ivor Roberts KCMG FCIL President of Trinity College Oxford Former British Ambassador to Yugoslavia Ireland and Italy

Quality in Higher Education as a Tool for Human Development Patience Mukwambo, 2019-04-11 Whilst many studies have explored how quality in higher education is conceptualised in the Global North less attention has been paid to quality in higher education in Africa and the Global South This book uses the human development and capabilities approach to demonstrate how quality in teaching and learning contributes to a range of benefits such as improved wellbeing economic outcomes political engagement and human capital formation amongst graduates The book interrogates the various dimensions of quality as well as factors that impact on the realisation of quality in universities and society at large Recognising that measures of quality are context and stakeholder specific the book uses the Zimbabwean context as a Global South case study It evaluates how quality is conceptualised and operationalised in Zimbabwean universities and how that impacts on teaching and learning policy and practice The book also demonstrates the need for economic resources for individuals and universities and emphasises the importance of a social and educational environment conducive to critical learning and post university opportunities This book will be of interest to researchers across Education African and Development Studies as well as to policymakers and practitioners with an interest in quality assurance and the promotion of teaching and learning in universities in the Global South
