ICED-QA 2019 Yulia Hendri Yeni, Handoko, Elizabeth Campbell-Dorning, 2021-04-02 The quality improvement of higher education is needed to guarantee the quality of the graduates for the future competitiveness. Due to the local and global changes and the issue of Industrial Revolution 4.0, higher education needs to comply with the paradigm. Labor requirements competence requires curriculum reformation from input-based education to outcome-based education. In learning the paradigm friction appears from instructional paradigm to learning paradigm. To solve the related proportion, LP3M Institute of Educational Development and Quality Assurance Universitas Andalas initiated the International Conference on Educational Development and Quality Assurance ICED QA 2. This conference was attended by experts and researchers from different countries to discuss the issues about Educational Quality Development in Industrial Revolution 4.0. Teaching Chemistry in Higher Education Michael Seery, Claire Mc Donnell, 2019-07-01 Teaching Chemistry in Higher Education celebrates the contributions of Professor Tina Overton to the scholarship and practice of teaching and learning in chemistry education. Leading educators in United Kingdom, Ireland, and Australia, three countries where Tina has had enormous impact and influence, have contributed chapters on innovative approaches that are well established in their own practice. Each chapter introduces the key education literature underpinning the approach being described. Rationales are discussed in the context of attributes and learning outcomes desirable in modern chemistry curricula. True to Tina's personal philosophy, chapters offer pragmatic and useful guidance on the implementation of innovative teaching approaches, drawing from the authors' experience of their own practice and evaluations of their implementation. Each chapter also offers key guidance points for implementation in readers' own settings so as to maximise their adaptability. Chapters are supplemented with further reading and supplementary materials on the book's website: overtonfestschrift.wordpress.com. Chapter topics include innovative approaches in facilitating group work, problem solving context, and problem-based learning, embedding transferable skills, and laboratory education, all themes relating to the scholarly interests of Professor Tina Overton. About the Editors: Michael Seery is Professor of Chemistry Education at the University of Edinburgh and is Editor of Chemistry Education Research and Practice. Claire Mc Donnell is Assistant Head of School of Chemical and Pharmaceutical Sciences at Technological University Dublin. Cover Art: Christopher Armstrong, University of Hull. **Research in Educational Settings** Geoffrey Maruyama, Stanley L. Deno, 1992-05-06 This volume aims to help prospective educational researchers plan their research in schools more carefully. It focuses on such issues as access and credibility in the school, traditional issues of designing research questions that emerge as the design is imposed on the school culture, and setting, particularly with regard to school staff and student assessment, the length of interventions, and whether or not to schedule follow-up studies, and how to interpret and communicate findings to schools and policy makers. Using personal experiences from their field research to illustrate key concepts, the authors have also included a research project to clarify the practical issues of school research.
