problem Why development must be central and sit alongside knowledge transfer as AI takes over expertise How motivation and value systems evolve and are key to change How to drive behaviour change to transform outcomes What human centred means now in a reinvented system Offering much needed insights guidance and solutions for teachers school leaders and policy makers this book will be valuable reading for all those interested in school improvement and education policy

Policy, Belief and Practice in the Secondary English Classroom Bethan Marshall, Simon Gibbons, Louise Hayward, Ernest Spencer, 2018-11-01 Studies of comparative classroom practice in the teaching of secondary English are limited especially when it comes to exploration of the day to day practice of English teachers in the secondary classroom This book presents a case study analysis of secondary classroom practice in three countries Canada England and Scotland Each country has had different degrees of state involvement within the secondary English curriculum over the last twenty years England has had the highest degree of state involvement in that it has had several statutory national curricula and a variety of assessment regimes Scotland has had a non statutory curriculum and no national tests and Canada has had no national curriculum at all with education being determined at province level and each province varying its policies The research adopts a case study approach involving both classroom observation and interviews with teachers Through this the authors explore the impact of state involvement on the reality of what happens in secondary English classrooms The book invites readers to consider the applicability of the findings to their own contexts to examine their own practice in the light of this and to consider the nature of the relationships between policy personal belief and practice in the teaching of English **Commerce Business Daily**
