Goodfellow, 1985 Here for the first time is an authoritative technical reference book covering all aspects of state of the art design of ventilation systems for contaminant control for a wide variety of manufacturing and processing industries The author has played a key role in the development of the subject and this book is based on his extensive consulting experience in the practical engineering design of contaminant control systems world wide as well as his personal research work The material is organized specifically for ease of understanding and contains all the technical information needed to develop cost effective solutions for any type of contaminant in the workplace environment A unique feature is the development of recommended subject classifications for the ventilation field For each type of ventilation system the fundamental design equations are developed from theoretical principles and numerous examples are given of the practical application of these design equations to solving industrial ventilation problems

ASHRAE Handbook ,1999 American National Standard - Fundamentals Governing the Design and Operation of Local Exhaust Ventilation Systems American National Standards Institute,2001 Design and Planning of Research and Clinical Laboratory Facilities Leonard Mayer,1995-02-20

DESIGN and PLANNING of Research and Clinical LABORATORY FACILITIES In this primer professional reference Leonard Mayer demystifies one of the most complex architectural specialties An architect with more than thirty three years experience as a master planner and programmer of laboratories and clinical facilities Mr Mayer offers a comprehensive overview of the fundamental issues related to laboratory planning and design He also provides designers with a clear and rational framework through which to approach this highly challenging and rewarding design specialty A superb learning tool for students and professionals just getting started in lab design and a valuable one volume reference for the experienced professional

Design and Planning of Research and Clinical Laboratory Facilities features Step by step guidance through the complex maze of codes specifications standards and official guidelines relating to the planning design and construction processes New and updated design criteria based on the most recent laws and regulations Master plans facility programs functional programs and requirements programs for a wide variety of scientific and medical disciplines and support facilities Comprehensive lists of relevant codes regulations standards guidelines and important architectural structural mechanical electrical and plumbing criteria

Research and clinical laboratory facilities are perhaps the most complex structures to plan and design Intimidated by a vast and seemingly impenetrable body of codes regulations and design criteria pertaining to lab design and construction many architects unfortunately choose to avoid what can be one of the most profitable and professionally rewarding areas of specialization Written by an architect with more than thirty three years of experience as a master planner and programmer of laboratories and clinical facilities this book demystifies the process of laboratory planning and design It provides a comprehensive overview of the fundamental issues related to laboratory design and offers readers detailed step by step guidance through the complex maze of design specifications and codes standards and official guidelines that must be addressed during the programming planning design and construction process

Focusing mainly on laboratory programming planning and design criteria for wet laboratory environments Leonard Mayer provides examples from numerous master plans facility programs functional programs and requirements programs applicable to a wide variety of scientific and medical disciplines and related facilities Related functions and activities include administrative offices computer centers core service and support building services facilities and more He presents new and updated design criteria based on recent laws and regulations and supplies readers with comprehensive lists of relevant codes regulations standards guidelines and architectural structural mechanical electrical and plumbing criteria

Design and Planning of Research and Clinical Laboratory Facilities is an excellent primer for architecture students and newcomers to the field as well as an indispensable single volume reference for experienced professionals It is also an invaluable resource for researchers and investigators facility planners and managers

plant engineers and all others involved with the design construction maintenance and administration of laboratory facilities
