Harnessing the Internet of Things (IoT) for a Hyper-Connected Smart World Indu Bala,Kiran Ahuja,2022-10-06 Showcasing the diverse ways that IoT can be employed for improvement in many areas of contemporary life this new volume explores a multitude of IoT applications that provide advanced solutions for real world problems The selection of topics includes network on chip as the new paradigm for system on chip integration for maintaining high performance for IoT applications new router designs to increase speed and the challenges of wireless underground sensor networks which have a wide range of applications in military underground sensing testing soil traits and moisture content pollution control and location detection security and detection of natural calamities Various state of the art techniques such as optimization schemes blockchain machine learning orthogonal frequency division multiplexing etc are also discussed in the context of cognitive IoT The volume considers the uses of IoT in agriculture discussing challenges along with solutions with the help of the latest technical smart tools to uplift the farming community specifically IoT applications for information gathering to improve yield productivity food and crop quality and sustainability monitoring toxic substances and soil properties etc The book also covers a broad spectrum of IoT applications in the educational industry along with the challenges associated with them and how to facilitate the use of smart classroom technology A chapter on IoT in the healthcare industry presents an IoT based GPS enabled smart jacket design to monitor heart rate sugar level blood pressure fever and stress level The authors also present an IoT based Peltier air conditioner design that overcomes the limitations of existing HVAC framework a review of various energy harvesting techniques to generate electrical power from non conventional power sources with their merits and demerits and much more

Interconnecting Smart Objects with IP Jean-Philippe Vasseur,Adam Dunkels,2010-07-06 Interconnecting Smart Objects with IP The Next Internet explains why the Internet Protocol IP has become the protocol of choice for smart object networks IP has successfully demonstrated the ability to interconnect billions of digital systems on the global Internet and in private IP networks Once smart objects can be easily interconnected a whole new class of smart object systems can begin to evolve The book discusses how IP based smart object networks are being designed and deployed The book is organized into three parts Part 1 demonstrates why the IP architecture is well suited to smart object networks in contrast to non IP based sensor network or other proprietary systems

that interconnect to IP networks e g the public Internet of private IP networks via hard to manage and expensive multi protocol translation gateways that scale poorly Part 2 examines protocols and algorithms including smart objects and the low power link layers technologies used in these networks Part 3 describes the following smart object network applications smart grid industrial automation smart cities and urban networks home automation building automation structural health monitoring and container tracking Shows in detail how connecting smart objects impacts our lives with practical implementation examples and case studies Provides an in depth understanding of the technological and architectural aspects underlying smart objects technology Offers an in depth examination of relevant IP protocols to build large scale smart object networks in support of a myriad of new services **Monthly Catalogue, United States Public Documents** ,1994-12
