

Intergraph SmartMarine 3D – эффективное решение для проектирования судов и морских сооружений

Проектировочный процесс в современном судостроении, которое является уникальной отраслью машиностроения, сопряжен с объективными сложностями, связанными со спецификой изделия – объекта производства. Есть и ряд организационно-технических трудностей, обусловленных устаревшей методологией проектно-конструкторских работ, наличием “зоопарка” систем САПР (конструкторских, технологических, расчетных). При этом база электронного документооборота и управления инженерными данными в судостроении довольно слабая, не удовлетворяющая современным требованиям. В результате – неизбежные потери данных и затем проблемы с их восстановлением, необходимость многократного внесения изменений в проект. Все это снижает эффективность производства и повышает стоимость продукции. При выборе специализированной САПР для судостроения, как правило, обращают большее внимание на ее CAD-часть: вопросы моделирования сложных обводов корпуса, специфических конструкций и т.п. При этом вопросы управления данными, информационного сопровождения этапов жизненного цикла объекта судостроения как бы выпадают за рамки интереса к системе. Единое информационное пространство предприятия воспринимается многими как нечто абстрактное, а требования по обеспечению информационной поддержки жизненного цикла корабля рассматриваются лишь применительно к конкретному проекту, а не в русле принципиального подхода. В данной статье вниманию судостроителей предлагается обзор возможностей комплексного решения компании Intergraph для проектирования судов и морских инженерных сооружений SmartMarine 3D (ранее IntelliShip), базирующийся на технологии под общим названием SmartMarine Enterprise, которая успешно применяется на предприятиях судостроительной и нефтегазовой отрасли.
