Water

Water is a substance in liquid form. First, it is a liquid which means it can splash in puddles or when you change its state, it can freeze, or steam when it is heated.

Water is also a lot of fun to play with. It can change its state, it can freeze, or steam when it is heated.

Water is important for life. Every living thing needs water to survive. It is the only substance on Earth which means we can find it in many places. Interestingly, water cannot be compressed. It takes up space that doesn't change. Sometimes it's warm, like in a hot bath, and sometimes it's cold, like in a snow machine.

Snow

Snow is a form of precipitation that falls from the sky. It is made of small ice crystals that stick together to form snowflakes. Snow is important for life because it keeps the ground cold and prevents the ground from freezing. Snow is also a lot of fun to play with. It can be used to make snow globes, snow globes, and snow globes.

...a vital natural resource. One of the most important things about water is that it can change state. It can be a liquid, a solid, or a gas. But when it changes back into snow, it can make snow globes, snow globes, and the snow globes.
