House of Commons, 1917. Beneficial Ownership in International Tax Law Angelika Meindl-Ringler, 2016-06-07. In international tax law, the term beneficial ownership refers to which parties involved in a cross border transaction are entitled to tax treaty benefits. However, determining beneficial ownership is a complex and often disputed issue, subject to different meanings in different countries. Archival research on its early use in tax treaties and in the developing OECD Model reveals that its meaning has changed dramatically over the decades, leading to new interpretations significantly affecting current tax practice and scholarship. This book, dedicated to establishing how beneficial ownership should ideally be interpreted, compares the use and interpretation of beneficial ownership both current and historical in a wide range of national jurisdictions, as well as the EU, ultimately shedding a clearer light than has heretofore been available on the meaning of the term. In her very thorough analysis of the application of beneficial ownership, the author touches on such aspects as the following: historical development of the beneficial ownership requirement as used in tax treaties and in the OECD Model Tax Convention on Income and on Capital; rules of double taxation conventions; application of the OECD's Action Plan on Base Erosion and Profit Shifting (BEPS); the problem of so-called white income; use of the substance over form principle; attribution of income; rules and the role of agents, nominees and conduit companies. Specific analysis of the use and interpretation of beneficial ownership in a domestic law and treaty context in numerous jurisdictions, with particular emphasis on the United Kingdom, Australia, the United States and Germany, is a major feature of the presentation. As a thorough guide to determining whether a person claiming tax treaty benefits is the true owner and which parties are excluded from treaty benefits, and to what extent, this book will be of immeasurable value to lawyers, tax authorities, policymakers and other professionals working with taxable international transactions of any kind. **The Economic Effects of Air Transport Market Liberalisation**

Eyden Samunderu, 2024-09-19. This book rigorously examines the air transport market liberalisation process on the African continent and presents key highlights, challenges and impediments to embracing an open skies market environment in Africa. It focuses on the economic impact of air transport liberalisation, policy constraints, challenges of harmonisation and regional economic integration, and its impact on air transport development, employing a quantitative assessment based on the Air Transport Liberalisation Index (ALI) to evaluate how an open skies policy would change the competitive dynamics of air transport in Africa. Adopting a two-tier gravity model, the book explores how demand and route networks would be impacted by the deregulation of the air transport market. The book also applies a historical perspective by evaluating the initial ratification of the Yamoussoukro Declaration 1999, which acted as a catalyst for Africa's 2063 regional agenda focused on

establishing the Single African Air Transport Market SAATM The book also provides a comprehensive analysis of the African Continental Free Trade Area AfCFTA exploring its multifaceted impacts on Africa's single market from economic regulatory and sustainability perspectives This includes an introduction to the AfCFTA highlighting its inception as a major step towards continental economic integration aimed at enhancing intra African trade promoting sustainable development and fostering industrial diversification It then examines the capacity and competency building of African aviation personnel Training gaps and skills are extensively evaluated to ensure that the African region is prepared for the new competitive equilibrium post SAATM The book also raises critical questions regarding the status of the African air transport market Firstly with the introduction of an open skies policy in Africa will the national flag carriers be able to compete under the new market dynamics Will the SAATM become a game changer in paving the way for the privatisation of some of Africa's poor performing airlines Will the SAATM create a competitive market and a shift in airfares How will policymakers deal with the excessive aviation taxes fees and charges that make airfares in Africa the highest in the world What will the economic benefits be for signatory states that embrace the SAATM Will there be a significant growth trajectory in terms of air travel demand This book is intended for researchers studying air transport economics in developing markets graduate students with a primary focus on air transport development senior policymakers and professionals at governmental agencies and industry practitioners who want to expand their understanding of the dynamics shaping Africa's air transport landscape
