South African Police Service Vacancies 2012:

Policing Major Events James F. Albrecht, Martha Christine Dow, Darryl Plecas, Dilip K. Das, 2014-11-20 Whenever a major event requires police intervention questions are raised about the nature of the police response Could the police have prevented the conflict been better prepared reacted more quickly Could they have acted more forcefully or brought the altercation under control more effectively Based upon real case studies of events from all *Police Integrity in South Africa* Sanja Kutnjak Ivkovich, Adri Sauerman, 2020-04-29 Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement In 1994 as the country's apartheid system was replaced with a democratic order the new government faced the significant challenge of transforming the South African police force into a democratic police agency the South African Police Service SAPS that would provide unbiased policing to all the country's people More than two decades since the initiation of the reforms it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity This book offers a unique perspective by providing in depth analyses of police integrity in South Africa It is a case study that systematically and empirically explores the contours of police integrity in a young democracy Using the organizational theory of police integrity the book analyzes the complex set of historical legal political social and economic circumstances shaping police integrity A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers probing their familiarity with official rules their expectations of discipline within the SAPS and their willingness to report misconduct The book also examines the influence of the respondents race gender and supervisory status on police integrity Written in a clear and direct style this book will appeal to students and scholars of criminology policing sociology political science as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations **Police Work and Identity** Andrew Faull, 2017-09-07 This is a book about the men and women who police contemporary South Africa Drawing on rich original ethnographical data it considers how officers make sense of their jobs and how they find meaning in their duties It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo liberalising regimes such as South Africa can be traced to the day to day experiences and ambitions of the average police officer It is about the stories they tell themselves about themselves and their social worlds and how these shape the order they produce through their work By focusing on police officers this book positions the individual in primacy over the organisation asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts It acknowledges but downplays the importance of police culture in determining officers attitudes and behaviour and reminds readers that most officers lives are entangled in and shaped by a range of social political and cultural forces It suggests that a job in the South African Police Service SAPS is primarily just that a job Most officers join the organisation after other dreams have slipped beyond reach their presence in the Service being almost accidental But once employed they re write their self narratives and enact

carefully choreographed performances to ease managerial and public pressure and to rationalize their coercive practices In an era where evidence and what works reigns supreme and where cop culture is often deemed a primary socializing force this book emphasises how officers personal histories ambitions and vulnerabilities remain central to how policing unfolds on the street

Security, Governance, and State Fragility in South Africa Edward L. Mienie, 2020-03-06 Do existing measures of state fragility measure fragility accurately Based on commonly used fragility measures South Africa SA is classified as a relatively stable state yet rising violent crime high unemployment endemic poverty eroding public trust identity group based preferential treatment policies and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility Based on a comprehensive view of security this study examines the extent to which measures of political legitimacy and good governance effectiveness in the security system especially with respect to the police system and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility Using a mixed methods approach based on quantitative secondary data analysis and semi structured interviews with government officials security practitioners and leading experts in the field this study finds that the combination of colonization apartheid liberation struggle transition from autocracy to democracy high levels of direct and structural violence stagnating social political and economic developments make South Africa a latently fragile state Conceptually the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility Practically this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility

Danger in Police Culture Gráinne Perkins, 2023-12-11 Through ethnographic research in South Africa this book explores the lived experiences of police navigating danger and death

Domains of Freedom Thembela Kepe, Melissa Levin, Bettina von Lieres, 2016-09-12 After more than 20 years of freedom in South Africa we have to ask ourselves difficult questions are we willing to perpetuate a lie search for facts or think wishfully Freedom has been enabled by apartheid s end but at the same time some of apartheid s key institutions and social relations are reproduced under the guise of democracy This collection of essays acknowledges the enormous expectations placed on the shoulders of the South African revolution to produce an alternative political regime in response to apartheid and global neo liberalism It does not lament the inability of South Africa s democracy to provide deeper freedoms or suggest that since it hasn t this is some form of betrayal Freedom is made possible and or limited by local political choices contemporary global conditions and the complexities of social change This book explores the multiplicity of spaces within which the dynamics of social change unfold and the complex ways in which power is produced and reproduced In this way it seeks to understand the often non linear practices through which alternative possibilities emerge the lengthy and often indirect ways in which new communities are imagined and new solidarities are built In this sense this book is not a collection of hope or despair Nor is it a book that seeks to situate itself between these two poles Instead it aims to read the

present historically critically and politically and to offer insights into the ongoing iterative and often messy struggles for freedom

Panic City Martin J. Murray, 2020-03-10 Despite the end of white minority rule and the transition to parliamentary democracy Johannesburg remains haunted by its tortured history of racial segregation and burdened by enduring inequalities in income opportunities for stable work and access to decent housing Under these circumstances Johannesburg has become one of the most dangerous cities in the world where the yawning gap between the haves and have nots has fueled a turn toward redistribution through crime While wealthy residents have retreated into heavily fortified gated communities and upscale security estates the less affluent have sought refuge in retrofitting their private homes into safe houses closing off public streets and hiring the services of private security companies to protect their suburban neighborhoods Panic City is an exploration of urban fear and its impact on the city's evolving siege architecture the transformation of policing and obsession with security that has fueled unprecedented private consumption of protection services Martin Murray analyzes the symbiotic relationship between public law enforcement agencies private security companies and neighborhood associations wherein buyers and sellers of security have reinvented ways of maintaining outdated segregation practices that define the urban poor as suspects

Mean Streets Crush, Jonathan, Chikanda, Abel, 2015-11-16 This book powerfully demonstrates that some of the most resourceful entrepreneurs in the South African informal economy are migrants and refugees Yet far from being lauded they take their life into their hands when they trade on South Africa's mean streets The book draws attention to what they bring to their adopted country through research into previously unexamined areas of migrant entrepreneurship Ranging from studies of how migrants have created agglomeration economies in Jeppe and Ivory Park in Johannesburg to guanxi networks of Chinese entrepreneurs to competition and cooperation among Somali shop owners to cross border informal traders to the informal transport operators between South Africa and Zimbabwe the chapters in this book reveal the positive economic contributions of migrants these include generating employment paying rents providing

cheaper goods to poor consumers and supporting formal sector wholesalers and retailers As well Mean Streets highlights the xenophobic responses to migrant and refugee entrepreneurs and the challenges they face in running a successful business on the streets Global Perspectives on Crime Prevention and Community Resilience Diana Scharff Peterson,Dilip K.

Bashige Murhula,2024-10-15 *Gender Based Violence in Sub Saharan Africa Prevalence Patterns and Policies* examines the multifaceted issue of gender based violence GBV in Sub Saharan Africa offering an in depth exploration of its prevalence underlying patterns and the policies and frameworks that aim at addressing it The book provides a regional overview on the prevalence of GBV drawing on a wealth of statistical data and case studies and examines the diverse forms of gender based violence on the African sub region including domestic violence sexual harassment trafficking and harmful traditional practices highlighting the complex social cultural and economic factors that create and sustain these abuses In analyzing GBV patterns contributing authors investigate the dynamics of power and control that underpin gender based violence exploring how the intersection of identities such as class migration and sexuality influence individuals experiences The policy component evaluates international national and local responses to GBV and reviews existing legal frameworks protection mechanisms and support services identifying both best practices and significant gaps It also considers the effectiveness of public awareness campaigns education programs and community based interventions in shifting societal attitudes and reducing the incidence of GBV This book provides essential insights for policymakers researchers students and activists committed to combating GBV and supporting survivors **Ending Africa's Energy Deficit and the Law** Yinka

Omorogbe,Ada Ordor,2018-02-09 With the inclusion of access to energy in the sustainable development goals the role of energy to human existence was finally recognized Yet in Africa this achievement is far from realized Omorogbe and Ordor bring together experts in their fields to ask what is stalling progress examining problems from institutions catering to vested interests at the continent s expense to a need to develop vigorous financial and fiscal frameworks The ramifications and complications of energy law are labyrinthine this volume discusses how energy deficits can burden disabled people women

and children in excess of their more fortunate counterparts as well as considering environmental issues including the delicate balance between the necessity of water for drinking and cleaning and the use of water in industrial processes A pivotal work of scholarship the book poses pressing questions for energy law and international human rights *Handbook of Labour Geography* Andrew Herod, 2025-10-07 This illuminating Handbook provides a comprehensive overview of the exciting field of labour geography examining how spatial circumstances shape workers lives and behaviour as well as how workers shape landscapes It explores the history of labour geography how the field has developed globally and how labour geographers have conceptualised worker agency Finding a moral compass for South Africa JM Vorster, 2023-07-31 The research question of this book reads Can South Africans amidst all the contemporary distrust in political leadership and moral decay find a moral compass that could lead them to a humane society of mutual trust respect for each other a flourishing life and a bright future for future generations This book presents new perspectives on the psychopathology created by colonisation the failures of the post 1994 dispensation regarding reconciliation transformation justice distorted family life violence unity in diversity as well as moral leadership and agency and indifference to a future of hope It proposes a new moral compass that can lead South Africa out of the abyss **A Citizen's Guide to Crime Trends in South Africa** Anine Kreigler, Mark Shaw, 2016-06-05 South Africans care a lot about crime We think and worry about it plan and insure against it develop and share theories about it read about it and talk about it a lot But how much do we really know Crime statistics do not belong to the government academics specialists or the press They are ours we experience and report crimes and have a right to access and understand their official record It should not take any particular expertise to get a grasp on what we should make of the figures and graphs that the South African Police Service produces every year A Citizen's Guide to Crime Trends in South Africa provides a basis on which to understand the statistics in a manner that is accessible to everyone Each chapter challenges a set of oft repeated assumptions about how bad crime is where it occurs and who its victims are It also demonstrates how and why crime statistics need to be matched with other forms of research including criminal justice data in order to produce a fuller account of what we are faced with *The Struggle for Development* Benjamin Selwyn, 2017-08-31 The world economy is expanding rapidly despite chronic economic crises Yet the majority of the world's population live in poverty Why are wealth and poverty two sides of the coin of capitalist development What can be done to overcome this destructive dynamic In this hard hitting analysis Benjamin Selwyn shows how capitalism generates widespread poverty gender discrimination and environmental destruction He debunks the World Bank's dollar a day methodology for calculating poverty arguing that the proliferation of global supply chains is based on the labour of impoverished women workers and environmental ruin Development theories from neoliberal to statist and Marxist are revealed as justifying and promoting labouring class exploitation despite their pro poor rhetoric Selwyn also offers an alternative in the form of labour led development which shows how collective actions by labouring classes whether South

African shack dwellers and miners East Asian and Indian Industrial workers or Latin American landless labourers and unemployed workers can and do generate new forms of human development This labour led struggle for development can empower even the poorest nations to overcome many of the obstacles that block their way to more prosperous and equitable lives
