Layne, Peter Lake, 2014-11-19 This book examines current trends in higher education and the Scholarship of Teaching and Learning It introduces readers to pedagogical strategies that instructors worldwide are using to overcome some of the challenges they face in higher education To maximize their students learning this work argues that institutions are compelled to innovate their policies and instructors must be collaborative and creative in their practices in response to students growing demands needs challenges to their learning and the shifting terrain of a rapidly globalizing world The text explores the idiosyncrasies and challenges that drive innovation across particular cultures disciplines and institutions It suggests that the responses to these drivers offer some universal and compatible lessons that not only optimize teaching and learning but also transgress institutional cultural and disciplinary boundaries in higher education The contributors to this collection work in the United States the United Kingdom Africa Asia Australia Scandinavia and the Middle East They represent a broad range of disciplines fields and institutional types They teach in varied contexts durations delivery modes and formats including online study abroad blended accelerated condensed intensive and mortar and brick settings Their higher education students are equally as diverse in age cultural backgrounds and needs but willingly lend their voices and experiences to their instructors study of teaching and learning in their particular contexts This book harnesses the rich diversities and range our contributors represent and shares the results of their expertise research and assessments of some of the most creative and effective ways to improve student learning in the face of stagnant practices limited resources and other deficiencies that instructors and students face in higher education **Cumulated Index Medicus**, 1993 *Resources in Education*, 2000-10 *Improving Student Learning at Scale* Keston H. Fulcher, Caroline Prendergast, 2023-07-03 This book is a step by step guide for improving student learning in higher education The authors argue that a fundamental obstacle to improvement is that higher educators administrators and assessment professionals do not know how to improve student learning at scale By this they mean improvement efforts that span an entire program affecting all affiliated students The authors found that faculty and administrators particularly struggle to conceptualize and implement multi section multi course improvement efforts It is unsurprising that ambitious wide reaching improvement efforts like these would pose difficulty in their organization and implementation This is precisely the problem the authors address The book provides practical strategies for learning improvement enabling faculty to collaborate and integrating leadership social dynamics curriculum pedagogy assessment and faculty development In Chapter 2 the authors tell a program level improvement story from the perspective of a faculty member Chapter 3 inverts Chapter 2 Beginning from the re assess stage the authors work their way back to the individual faculty member first pondering whether she can do

something to impact students skills They peel back each layer of the process and imagine how learning improvement efforts might be thwarted at each stage Chapters 4 through 9 dig deeper into the learning improvement steps introduced in Chapters 2 and 3 Each chapter provides strategies to help higher educators climb each step successfully Chapter 10 paints a picture of what higher education could look like in 2041 if learning improvement were embraced And finally Chapter 11 describes what you can do to support the movement Bibliography of Agriculture with Subject Index ,1980-10
