Ethics of Belonging Erica M. Larson, 2023-11-30 The city of Manado and province of North Sulawesi have built a public identity based on religious harmony claiming to successfully model tolerance and inter religious relations for the rest of Indonesia Yet in discourses and practices relevant to everyday interactions in schools and political debates in the public sphere two primary contested frames for belonging emerge in tension with one another On the one hand aspirational coexistence recognizes a common goal of working toward religious harmony and inclusive belonging On the other hand majoritarian coexistence in which the legitimacy of religious minorities is understood as guaranteed exclusively by the goodwill of the Protestant majority also emerges in discourses and practices of coexistence These two agonistic frames of coexistence stem from both a real pride at having staved off ethno religious violence that plagued surrounding regions at the turn of the twenty first century as well as a concern about whether the area will maintain a Christian majority in the future Based on ethnographic research in Manado North Sulawesi a Protestant majority region of Indonesia *Ethics of Belonging* investigates the dynamics of ethical deliberation about religious coexistence In this analysis schools are understood as central sites for exchange about the ethics and politics of belonging in the nation The author draws on in depth fieldwork at three secondary schools a public high school private Catholic boarding school and public madrasah an inter religious exchange program among university students and societal debates about religion and belonging Each of the schools promotes a distinct method to addressing diversity and a particular understanding of the relationship between religious and civic values Larson s research demonstrates how ethical frameworks for approaching religious difference are channeled and negotiated through educational institutions linking up with their broader political context and debates in the community This resource argues for a consideration of ethical reflection as a fundamentally pedagogical process with important ramifications beyond the immediate environment The focus on educational institutions provides a critical connection between interpersonal and public ethical deliberation elucidating the entanglements of ethics and politics and their manifestation across different societal scales *Southwestern Medicine* ,1926 *English in Context SMA* , *Memoirs of Indonesian Doctors* Tjien Oei, 2009-03-12 This is a book depicting the lives of twenty Chinese Indonesian doctors who left Indonesia to immigrate to the USA and to start a new chapter of their lives Many of the stories started after they graduated from the Medical School Some of them were placed in remote villages outside Java Many of those villages had not been served by Physicians before Support from the Central Government was scarce At that time the late President Sukarno declared that graduated from Medical schools had to serve the country for three years before they were allowed to specialize or pursue their future plans These doctors must complete the ECFMG English and health tests before they could be considered for accredited for internship residency After successfully doing their training they now could apply for a position as a specialist in a hospital or a medical center Many times they had to be under the supervision of a hospital Director of Education for a

period of 2 years In the meantime they had to take their Specialty Boards exam to be qualified Many have successfully done their practice and some became well known in their fields Their Children went to Colleges and Universities and have pursued careers in Medicine Law Engineering and others
