An Integrated Formal Task Specification Method for Smart Environments Maik Wurdell, 2011 This thesis is concerned with the development of interactive systems for smart environments One of the characteristic of smart environments is the need to support different interaction paradigms at runtime On the one hand interaction is performed explicitly the user performs an action in order to interact with the system e.g. pressing a button to adjust the light On the other hand actions of the user are interpreted by the smart environment even though they have not been performed primarily to interact with the system implicit interactions e.g. walking to the speaker's desk to give a talk A smart environment tries to infer those interactions to assist the user in her work e.g. display slides at the projection canvas Both interaction paradigms originate from different research fields and are currently treated independently although implicit and explicit interaction mutually influence each other and occur interleaved The thesis introduces a task modeling language in order to cope with the given requirements of smart environments which can be used to perform interaction development for smart environments in a model based fashion for both interaction paradigms

Rajak,Parveen Kumar,Sarita Rathee,2024-08-14 This book presents an analysis of the existing surveys in the literature of batteries chargers control systems battery management systems plugs sockets drives and fuel cell based and plug in smart electric and hybrid vehicles It provides detailed comparative analysis of parameters of intelligent electric and hybrid vehicles with conventional vehicles and in depth knowledge of power electronics tools in smart electric and hybrid vehicles This book compiles the research work and findings in advancements of smart electric and hybrid vehicles from automobile mechanical electronic electrical computer science and allied engineering domains and explains how smart electric and hybrid vehicles can be utilized without harmful emissions over the entire lifecycle of a vehicle and how reliance on fossil fuels can be reduced Features Discusses different types of lightweight and robust materials for the fabrication of smart electric and hybrid vehicles Presents computational models emerging technologies numerical techniques and environmental and economic benefits applicable to electric vehicles Highlights the applications of smart and hybrid vehicles in diverse sectors including aerospace agriculture defense and medical Covers electromechanical drives storage systems wireless charging and component design for smart electric and hybrid vehicles Showcases a detailed comparative analysis of parameters of intelligent electric and hybrid vehicles with conventional vehicles It is primarily written for senior undergraduates graduate students and academic researchers in the fields of electrical engineering electrical and electronics engineering computer engineering and automotive engineering **Electronic Transmission Controls** Ronald K Jurgen,2000-06-10 The evolution of the automotive transmission has changed rapidly in the last decade partly due to the advantages of highly sophisticated electronic controls This evolution has resulted in modern automatic transmissions that offer more control stability and convenience to the driver Electronic Transmission Controls contains 68 technical papers from SAE and other international organizations written since 1995 on this rapidly growing area of automotive electronics This book breaks down the topic into two sections The section on Stepped Transmissions covers recent developments in regular and 4 wheel drive transmissions from major auto manufacturers including DaimlerChrysler General Motors Toyota Honda and Ford Technology covered in this section includes smooth shift control automatic transmission efficiency mechatronic systems fuel saving technologies shift control using information from vehicle navigation systems and fuzzy logic control The section on Continuously Variable Transmissions presents papers that demonstrate that CVTs offer better efficiency than conventional transmissions Technologies covered in this section include powertrain control fuel consumption improvement development of a 2 way clutch system internal combustion engines with CVTs in passenger cars control and shift strategies and CVT application to hybrid powertrains The book concludes with a chapter on the future of electronic transmissions in automobiles

Unmanned Driving Systems for Smart Trains Hui Liu,2020-11-13 Unmanned Driving Systems for Smart Trains explores the core technologies involved in unmanned driving systems for smart railways and trains from foundational theory to the

latest advances The volume introduces the key technologies research results and frontiers of the field Each chapter includes practical cases to ground theory in practice Seven chapters cover key aspects of unmanned driving systems for smart trains including performance evaluation algorithm based reasoning and learning strategy main control parameters data mining and processing energy saving optimization and control and intelligent algorithm simulation platforms This book will help researchers find solutions in developing better unmanned driving systems Responds to the expansion of smart railways and the adoption of unmanned global systems Covers core technologies of unmanned driving systems for smart trains Details a large number of case studies and experimental designs for unmanned railway systems Adopts a multidisciplinary view where disciplines intersect at key points Gives both foundational theory and the latest theoretical and practical advances for unmanned railways

Lemon-Aid New and Used Cars and Trucks 1990-2016 Phil Edmonston,2015-11-21 This book steers buyers through the the confusion and anxiety of new and used vehicle purchases unlike any other car and truck book on the market Dr Phil Canada s best known automotive expert for more than forty five years pulls no punches

Smart Automotive Mobility Gerrit Meixner,2020-09-16 This book focuses on smart results in the field of smart automotive mobility concentrating on semi autonomous cars The results are based on 5 recently finished public funded research projects with a budget of over 15 million Euro Providing insights into the next generation of personalized mobility on the road the authors discuss personalized adaptive cooperative systems for highly automated cars and how they can be developed in a human centered way Furthermore the book reports on a cooperative driver vehicle interaction How can the driver and the vehicle support each other What are their best skills and how can they benefit from each other It also gives novel insights on intuitive steering gestures on the steering wheel which initiate maneuvers to be executed by the automation and to be supervised by influenced or interrupted by the driver The book finishes with information on a cooperative laser beam system which improves the communication between the different road participants to optimize the road safety of tomorrow Smart Automotive Mobility Reliable Technology for the Mobile Human is an ideal source for researchers students and practitioners working in the area of intelligent systems for the automotive industry It gives valuable and condensed information from multi million Euro research projects funded by the German Federal Ministry of Education and Research

Connected and Autonomous Vehicles in Smart Cities Hussein T. Mouftah,Melike Erol-Kantarci,Sameh Sorour,2020-12-17 This book presents a comprehensive coverage of the five fundamental yet intertwined pillars paving the road towards the future of connected autonomous electric vehicles and smart cities The connectivity pillar covers all the latest advancements and various technologies on vehicle to everything V2X communications networking and vehicular cloud computing with special emphasis on their role towards vehicle autonomy and smart cities applications On the other hand the autonomy track focuses on the different efforts to improve vehicle spatiotemporal perception of its surroundings using multiple sensors and different perception technologies Since most of CAVs are expected to run on electric power studies on their electrification

technologies satisfaction of their charging demands interactions with the grid and the reliance of these components on their connectivity and autonomy is the third pillar that this book covers On the smart services side the book highlights the game changing roles CAV will play in future mobility services and intelligent transportation systems The book also details the ground breaking directions exploiting CAVs in broad spectrum of smart cities applications Example of such revolutionary applications are autonomous mobility on demand services with integration to public transit smart homes and buildings The fifth and final pillar involves the illustration of security mechanisms innovative business models market opportunities and societal economic impacts resulting from the soon to be deployed CAVs This book contains an archival collection of top quality cutting edge and multidisciplinary research on connected autonomous electric vehicles and smart cities The book is an authoritative reference for smart city decision makers automotive manufacturers utility operators smart mobility service providers telecom operators communications engineers power engineers vehicle charging providers university professors researchers and students who would like to learn more about the advances in CAEVs connectivity autonomy electrification security and integration into smart cities and intelligent transportation systems Smart Transportation Systems 2020

Krömker, 2020-07-10 This two volume set LNCS 12212 and 12213 constitutes the refereed proceedings of the Second International Conference on HCI in Mobility Transport and Automotive Systems MobiTAS 2020 held as part of the 22nd International Conference on Human Computer Interaction HCII 2020 in Copenhagen Denmark in July 2020 A total of 1439 full papers and 238 posters have been carefully reviewed and accepted for publication in HCII 2020 The papers cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas MobiTAS 2020 includes a total of 59 papers and they are organized in the following topical sections Part I Automated Driving and In Vehicle Experience Design UX topics in automated driving and designing in vehicle experiences Part II Driving Behavior Urban and Smart Mobility studies on driving behavior and urban and smart mobility The conference was held virtually due to the COVID 19 pandemic *Smart Thinking* Tony Lewin, 2004 The story of smart is an epic tale of genius inspiration hope disappointment disaster and ultimate triumph Funky stylish and fun smart is the youngest and most exciting brand of car on the market and it has revolutionised the way we think about cars and the way we use them

It has put much needed fun back into driving and even city motorists smile when they're at the wheel of a smart. But it nearly didn't happen at all. The revolutionary design was the product of the genius who invented the Swatch watch, saving the near bankrupt Swiss watch industry in the process. But these visionary ideas proved too radical and the tiny two-seater almost died at birth when a succession of backers lost their nerve. The sensational story of smart traces the decade-long history of this ambitious project, talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time.

Applications of Artificial Intelligence for Smart Technology Swarnalatha, P., Prabu, S., 2020-10-30. As global communities are attempting to transform into more efficient and technologically advanced metropolises, artificial intelligence (AI) has taken a firm grasp on various professional fields. Technology used in these industries is transforming by introducing intelligent techniques including machine learning, cognitive computing, and computer vision. This has raised significant attention among researchers and practitioners on the specific impact that these smart technologies have and what challenges remain. *Applications of Artificial Intelligence for Smart Technology* is a pivotal reference source that provides vital research on the implementation of advanced technological techniques in professional industries through the use of AI. While highlighting topics such as pattern recognition, computational imaging, and machine learning, this publication explores challenges that various fields currently face when applying these technologies and examines the future uses of AI. This book is ideally designed for researchers, developers, managers, academicians, analysts, students, and practitioners seeking current research on the involvement of AI in professional practices.

Savior Frank Camelio, 2012-09. Compelling High Tech Drama and International Intrigue. In Frank Camelio's gripping new thriller, *Savior*, Swiss geneticist Joshua Mason has made a discovery that promises good health and long life for all humanity. He wants everyone inoculated with his special serum, but on his terms only. Mason is also concealing the serum's full impact on humans and taking extravagant measures to hide his past. Meanwhile, the Supreme Trust, a clandestine international cabal, is funding its own genetic research with the purpose of controlling global population and demographics. As Mason and the Trust move separately and secretly to shape the future, their plans collide, prompting an investigation by the U.S. National Security Agency. The conflict entangles American geneticist Joyce Ching, historian Jim Rogers, and National Security agent Laura Andrews, who face mortal dangers in pursuit of the truth. As the three begin to comprehend the magnitude of Mason's findings and the Trust's grand strategy, shocking revelations surface, disclosures that alter history and foreshadow a precarious future. Whichever future prevails, *Savior* will make readers ask themselves: Given the choice, would I take Mason's serum?
