Walkable City Rules Jeff Speck, 2018-10-15 Cities are the future of the human race and Jeff Speck knows how to make them work David Owen staff writer at the New Yorker Nearly every US city would like to be more walkable for reasons of health wealth and the environment yet few are taking the proper steps to get there The goals are often clear but the path is seldom easy Jeff Speck s follow up to his bestselling *Walkable City* is the resource that cities and citizens need to usher in an era of renewed street life *Walkable City Rules* is a doer s guide to making change in cities and making it now The 101 rules are practical yet engaging worded for arguments at the planning commission illustrated for clarity and packed with

specifications as well as data For ease of use the rules are grouped into 19 chapters that cover everything from selling walkability to getting the parking right escaping automobilism making comfortable spaces and interesting places and doing it now Walkable City was written to inspire Walkable City Rules was written to enable It is the most comprehensive tool available for bringing the latest and most effective city planning practices to bear in your community The content and presentation make it a force multiplier for place makers and change makers everywhere Sustainable Transportation and Smart Logistics Javier Faulin, Scott Grasman, Angel Juan, Patrick Hirsch, 2018-11-13 Sustainable Transportation and Smart Logistics Decision Making Models and Solutions provides deterministic and probabilistic models for transportation logistics problem solving and decision making The book presents an overview of the intersections between sustainability transportation and logistics and delves into the current problems associated with the implementation of sustainable transportation and smart logistics in urban settings It also offers models for addressing complex structural problems and procedures for estimating transportation externalities such as environmental and social impacts both in industrial and government arenas as well as decision making models from operational tactical and strategic management perspectives Sustainable Transportation and Smart Logistics also covers best practices for practical corporate policy implementation making it a comprehensive and vital resource for researchers graduate students practitioners and policy makers in transportation logistics urban planning economics engineering and environmental science Examines various modes of transportation Includes mathematical models for decision making in a wide variety of situations Presents public transportation and smart cities use cases *From Intelligent to Smart Cities* Mark Deakin, Husam Al Waer, 2015-04-24 The concept of smart cities offers a revolutionary vision of urban design for sustainability Utilizing the intelligent application of new technologies smart cities also incorporate considerations of social and environmental capital in order to transform the life and work of cities This book brings together papers from leading international experts on the transition to smart cities Drawing upon the experiences of cities in the USA Canada and Europe the authors describe the definitional components critical insights and institutional means by which we can achieve truly smart cities The resulting volume will be of interest to all involved in urban planning architecture and engineering as well as all interested in urban sustainability This book was published as a special issue of Intelligent Buildings International **The Housing Bomb** M. Nils Peterson, Tarla Peterson, Jianguo Liu, 2013-10-29 How our thirst for more and larger houses is undermining society and what we can do about it Have we built our way to ruin Is your desire for that beach house or cabin in the woods part of the environmental crisis Do you really need a bigger home Why don't multiple generations still live under one roof In *The Housing Bomb* leading environmental researchers M Nils Peterson Tarla Rai Peterson and Jianguo Liu sound the alarm explaining how and why our growing addiction to houses has taken the humble American dream and twisted it into an environmental and societal nightmare Without realizing how much a contemporary home already contributes to environmental destruction most of us

want bigger and bigger houses and dream of the day when we own not just one dwelling but at least the two our neighbor does We push our children to get out on their own long before they need to creating a second household where previously one existed We pave and build demolishing habitat needed by threatened and endangered species adding to the mounting burden of global climate change and sucking away resources much better applied to pressing societal needs Reduce reuse recycle is seldom evoked in the housing world where economists predict financial disasters when new housing starts decline and the idea of renovating inner city residences is regarded as merely a good cause Presenting irrefutable evidence this book cries out for America and the world to intervene by making simple changes in our household energy and water usage and by supporting municipal state national and international policies to counter this devastation and overuse of resources It offers a way out of the mess we are creating and envisions a future where we all live comfortable nondestructive lives The housing bomb is ticking and our choice is clear change our approach or feel the blast

Creating Smart Cities Claudio Coletta, Leighton Evans, Liam Heaphy, Rob Kitchin, 2018-10-26 In cities around the world digital technologies are utilized to manage city services and infrastructures to govern urban life to solve urban issues and to drive local and regional economies While smart city advocates are keen to promote the benefits of smart urbanism increased efficiency sustainability resilience competitiveness safety and security critics point to the negative effects such as the production of technocratic governance

the corporatization of urban services technological lock ins privacy harms and vulnerability to cyberattack This book through a range of international case studies suggests social political and practical interventions that would enable more equitable and just smart cities reaping the benefits of smart city initiatives while minimizing some of their perils Included are case studies from Ireland the United States of America Colombia the Netherlands Singapore India and the United Kingdom These chapters discuss a range of issues including political economy citizenship standards testbedding urban regeneration ethics surveillance privacy and cybersecurity This book will be of interest to urban policymakers as well as researchers in Regional Studies and Urban Planning The Routledge Companion to Smart Cities Katharine S. Willis,Alessandro Aurigi,2020-03-27

The Routledge Companion to Smart Cities explores the question of what it means for a city to be smart raises some of the tensions emerging in smart city developments and considers the implications for future ways of inhabiting and understanding the urban condition The volume draws together a critical and cross disciplinary overview of the emerging topic of smart cities and explores it from a range of theoretical and empirical viewpoints This timely book brings together key thinkers and projects from a wide range of fields and perspectives into one volume to provide a valuable resource that would enable the reader to take their own critical position within the topic To situate the topic of the smart city for the reader and establish key concepts the volume sets out the various interpretations and aspects of what constitutes and defines smart cities It investigates and considers the range of factors that shape the characteristics of smart cities and draws together different disciplinary perspectives The consideration of what shapes the smart city is explored through discussing three broad parts issues of governance the nature of urban development and how visions are realised and includes chapters that draw on empirical studies to frame the discussion with an understanding not just of the nature of the smart city but also how it is studied understood and reflected upon The Companion will appeal to academics and advanced undergraduates and postgraduates from across many disciplines including Urban Studies Geography Urban Planning Sociology and Architecture by providing state of the art reviews of key themes by leading scholars in the field arranged under clearly themed sections

Co-Creation and Smart Cities Shenja van der Graaf,Le Anh Nguyen Long,Carina Veeckman,2021-11-15 Co creation and Smart Cities Looking Beyond Technology highlights a more robust value based perspective on public service development and delivery helping structure co creation processes that foster responsible innovation and a systemic value based approach to sustainable urban development *Multiuse Wetlands Governance* Dinesh K. Marothia,2023-11-24 The Ramsar

Convention was established in 1971 to ensure the conservation and wise use of wetlands across the world India joined the Convention in 1982 however in the past 50 years despite Ramsar s incredible achievements the threat to wetlands across the globe including India has not diminished This book studies the governance of multiuse wetlands in India The volume provides an exhaustive analysis of rural peri urban and urban human made wetlands to establish the relevance of institutional design and the effective role of authority in governing multiuse wetland ecosystem services The author argues that the most

challenging task in governing wetlands is to frame institutional choices that users and non users comprehend and agree to pursue under alternative property rights regimes Drawing on extensive fieldwork the book provides a broad look into the causes and consequences of wetland ecosystem degradation and offers insights into improved sustainable management systems for different types of multiuse wetlands It will be indispensable for students and researchers of environmental studies sustainable development biodiversity conservation and agricultural natural and environmental resource economics

The Art of Classic Planning Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world's most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers *The Art of Classic Planning* restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities

Public Transport Planning with Smart Card Data Fumitaka Kurauchi, Jan-Dirk Schmöcker, 2017-02-17 Collecting fares through smart cards is becoming standard in most advanced public transport networks of major cities around the world Travellers value their convenience and operators the reduced money handling fees Electronic tickets also make it easier to integrate fare systems to create complex time and space differentiated fare systems and to provide incentives to specific target groups A less utilised benefit is the data collected through smart cards Records even if anonymous provide for a much better understanding of passengers travel behaviour as current literature shows This information can also be used for better service planning *Public Transport Planning with Smart Card Data* handles three major topics how passenger behaviour can be estimated using smart card data how smart card data can be combined with other trip databases and how the public transport service level can be better evaluated if smart card data is available The book discusses theory as well as applications from cities around the world and will be of interest to researchers and
