Advances in Big Data and Cloud Computing J. Dinesh Peter, Amir H. Alavi, Bahman Javadi, 2018-12-12 This book is a compendium of the proceedings of the International Conference on Big Data and Cloud Computing It includes recent advances in the areas of big data analytics cloud computing internet of nano things cloud security data analytics in the cloud smart cities and grids etc This volume primarily focuses on the application of the knowledge that promotes ideas for solving the problems of the society through cutting edge technologies The articles featured in this proceeding provide novel ideas that contribute to the growth of world class research and development The contents of this volume will be of interest to researchers and professionals alike *Technical Proceedings*, 1994 *Technical Proceedings, CIEP 94*, 1994 Internet of Things and Analytics for Agriculture, Volume 2 Prasant Kumar Pattnaik, Raghvendra Kumar, Souvik Pal, 2019-10-24 This book addresses major challenges faced by farmers and the technological solutions based on Internet of Things IoT A major challenge in agriculture is cultivating and supplying high quality produce at the best Currently around 50% of global farm produce never reaches the end consumer due to wastage and suboptimal prices The book presents solutions that reduce the transport costs improve the predictability of prices based on data analytics and the current market conditions and reduce the number of middle steps and agents between the farmer and the end consumer It discusses the design of an IoT based monitoring system to analyze crop environments and a method to improve the efficiency of decision making by analyzing harvest statistics Further it explores climate smart methods known as smart agriculture that have been adopted by a number of Indian farmers Army, 1987 **Innovative Technologies in Intelligent Systems and Industrial Applications** Subhas Chandra Mukhopadhyay, S.M. Namal Arosha Senanayake, P. W. C. Prasad, 2024-12-29 This book presents the proceedings of the 8th International Conference on Innovative Technologies in Intelligent Systems Industrial Application CITISIA held in virtual mode in Sydney Australia and Kuala Lumpur Malaysia on November 16 18 2023 It showcases advances and innovations in Industry 4 0 smart society 5 0 mobile technologies smart manufacturing smart data fusion hybrid intelligence cloud computing and digital society **Drawing Programs: The Theory and Practice of Schematic Functional Programming** Tom Addis, Jan Addis, 2009-10-30 Drawing Programs The Theory and Practice of Schematic Functional Programming describes a diagrammatic schematic approach to programming It introduces a sophisticated tool for programmers who would rather work with diagrams than with text The language is a complete functional language that has evolved into a representation scheme that is unique The result is a simple coherent description of the process of modelling with the computer The experience of using this tool is introduced gradually with examples small projects and exercises The new computational theory behind the tool is interspersed between these practical descriptions so that the reasons for the activity can be understood and the activity in turn illustrates some elements of the theory Access to the tool its source code and a set of examples that range from the simple to the complex is free see www.springer.com 978 1 84882 617 5 A

description of the tool's construction and how it may be extended is also given. The authors' experience with undergraduates and graduates who have the understanding and skill of a functional language learnt through using schema have also shown an enhanced ability to program in other computer languages. Readers are provided with a set of concepts that will ensure a good robust program design and what is more important a path to error free programming.

Energy Management Handbook Stephen A. Roosa, Steve Doty, Wayne C. Turner, 2020-12-17 This comprehensive handbook is recognized as the definitive stand alone energy manager's desk reference used by tens of thousands of professionals throughout the energy management industry. This new ninth edition includes new chapters on energy management controls systems, compressed air systems, renewable energy and carbon reduction. There are major updates to chapters on energy auditing, lighting systems, boilers and fired systems, steam and condensate systems, green buildings, waste heat recovery, indoor air quality, utility rates, natural gas purchasing, commissioning, financing and performance contracting and much more with numerous new and updated illustrations, charts, calculation procedures and other helpful working aids.

Encyclopedia of Automotive Engineering, 2015-03-23 Erstmals eine umfassende und einheitliche Wissensbasis und Grundlage für weiterführende Studien und Forschung im Bereich der Automobiltechnik. Die Encyclopedia of Automotive Engineering ist die erste umfassende und einheitliche Wissensbasis dieses Fachgebiets und legt den Grundstein für weitere Studien und tiefgreifende Forschung. Weitreichende Querverweise und Suchfunktionen ermöglichen erstmals den zentralen Zugriff auf Detailinformationen zu bewährten Branchenstandards und verfahrenszusammenhängende Konzepte und Techniken aus Spezialbereichen lassen sich so einfacher verstehen. Neben traditionellen Themen des Fachgebiets beschließt sich diese Enzyklopädie auch mit neuen Technologien, dem Übergang von der Mechanik zur Elektronik und den Möglichkeiten zur Herstellung sicherer, effizienterer Fahrzeuge unter weltweit unterschiedlichen wirtschaftlichen Rahmenbedingungen. Das Referenzwerk behandelt neun Hauptbereiche: 1 Motoren Grundlagen 2 Motoren Design 3 Hybrid und Elektroantriebe 4 Getriebe und Antriebssysteme 5 Chassis Systeme 6 Elektrische und elektronische Systeme 7 Karosserie Design 8 Materialien und Fertigung 9 Telematik. Zuverlässige Darstellung einer Vielzahl von Spezialthemen aus dem Bereich der Automobiltechnik. Zugängliches Nachschlagewerk für Jungingenieure und Studenten, die die technologischen Grundlagen besser verstehen und ihre Kenntnisse erweitern möchten. Wertvolle Verweise auf Detailinformationen und Forschungsergebnisse aus der technischen Literatur. Entwickelt in Zusammenarbeit mit der FISITA der Dachorganisation nationaler Automobil-Ingenieurverbände aus 37 Ländern und Vertretung von über 185 000 Ingenieuren aus der Branche. Erhältlich als stets aktuelle Online-Ressource mit umfassenden Suchfunktionen oder als Print-Ausgabe in sechs Bänden mit über 4 000 Seiten. Ein wichtiges Nachschlagewerk für Bibliotheken und Informationszentren in der Industrie, bei Forschungs- und Schulungseinrichtungen, Fachgesellschaften, Regierungsbehörden und allen Ingenieurstudenten. Richtet sich an Fachingenieure und Techniker aus der Industrie, Studenten höherer Semester und Studienabsolventen, Forscher, Dozenten und Ausbilder, Branchenanalysen und Forscher.

Layout Techniques for Integrated Circuit Designers Mikael Sahrling, 2022-08-31 This book provides complete step by step guidance on the physical implementation of modern integrated circuits showing you their limitations and guiding you through their common remedies The book describes today s manufacturing techniques and how they impact design rules You will understand how to build common high frequency devices such as inductors capacitors and T coils and will also learn strategies for dealing with high speed routing both on package level and on chip applications Numerous algorithms implemented in Python are provided to guide you through how extraction netlist comparison and design rule checkers can be built The book also helps you unravel complexities that effect circuit design including signal integrity matching IR drop parasitic impedance and more saving you time in addressing these effects directly You will also find detailed descriptions of software tools used to analyze a layout database showing you how devices can be recognized and connectivity accurately assessed The book removes much of fog that often hides the inner workings of layout related software tools and helps you better understand the physics of advanced nodes high speed techniques used in modern integrated technologies and the inner working of software used to analyze layout databases This is an excellent resource for circuit designers implementing a schematic in a layout database especially those involved in deep submicron designs as well as layout designers wishing to deepen their understanding of modern layout rules *Marine Electrical Technology* Mr. Rohit Manglik, 2024-05-04

EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Power Electronics for Renewable Energy Systems, Transportation and Industrial Applications** Haitham Abu-Rub, Mariusz Malinowski, Kamal Al-Haddad, 2014-06-02 Compiles current research into the analysis and design of power electronic converters for industrial applications and renewable energy systems presenting modern and future applications of power electronics systems in the field of electrical vehicles With emphasis on the importance and long term viability of Power Electronics for Renewable Energy this book brings together the state of the art knowledge and cutting edge techniques in various stages of research The topics included are not currently available for practicing professionals and aim to enable the reader to directly apply the knowledge gained to their designs The book addresses the practical issues of current and future electric and plug in hybrid electric vehicles PHEVs and focuses primarily on power electronics and motor drives based solutions for electric vehicle EV technologies Propulsion system requirements and motor sizing for EVs is discussed along with practical system sizing examples Key EV battery technologies are explained as well as corresponding battery management issues PHEV power system architectures and advanced power electronics intensive charging infrastructures for EVs and PHEVs are detailed EV PHEV interface with renewable energy is described with practical examples This book explores new topics for further research needed world wide and defines existing challenges concerns and selected problems that comply with international

trends standards and programs for electric power conversion distribution and sustainable energy development It will lead to the advancement of the current state of the art applications of power electronics for renewable energy transportation and industrial applications and will help add experience in the various industries and academia about the energy conversion technology and distributed energy sources Combines state of the art global expertise to present the latest research on power electronics and its application in transportation renewable energy and different industrial applications Offers an overview of existing technology and future trends with discussion and analysis of different types of converters and control techniques power converters high performance power devices power system high performance control system and novel applications Systematic explanation to provide researchers with enough background and understanding to go deeper in the topics covered in the book *Advanced Soft Electronics in Biomedical Engineering* Mengxiao Chen,2024-07-16 The book presents the latest advances in soft electronics in biomedical engineering and its potential applications in various biomedical fields The contributors provide comprehensive coverage of how soft electronics are used in diagnostics and monitoring medical therapy neural engineering and wearable and implantable systems In particular some emerging research areas such as advanced soft robotics fiber sensing technologies and power optimization strategies are explored In addition the book highlights international standardization activities in wearable technologies and implantable bioelectronics The book will benefit researchers engineers and advanced students in biomedical engineering electrical and computer engineering and materials science *Modern Ship Engineering, Design and Operations* Carlos Reusser,Joel Perez Osses,2021-12-22 Some marine propulsion systems are based on thermal machines that operate under the diesel cycle Their main advantages compared to other propulsion systems based on thermal machines are low specific fuel consumption and greater thermal efficiency However their main disadvantages lie in the emissions produced by combustion such as carbon dioxide CO₂ sulfur oxide SO_x and nitrogen oxide NO_x Over the last decade the International Maritime Organization IMO has adopted a series of regulations to reduce these emissions based on the introduction of several energy efficiency designs and operational indicators In this context this book focuses on the design and operation efficiency of ships through an analysis of the main propulsion systems It discusses the use of alternative fuels as well as the integration of hybrid and fully electric propulsion systems Ham Radio's Technical Culture Kristen Haring,2007 A history of ham radio culture how ham radio enthusiasts formed identity and community through their technical hobby from the 1930s through the Cold War InfoWorld ,1983-12-05 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Proceedings of International Conference on Network Security and Blockchain Technology** Jyotsna Kumar Mandal,Biswapati Jana,Tzu-Chuen Lu,Debashis De,2023-11-28 The book is a collection of best selected research papers presented at International Conference on Network Security and Blockchain Technology ICNSBT 2023 held at Vidyasagar University Midnapore India during March 24 26 2023 The book

discusses recent developments and contemporary research in cryptography network security cybersecurity and blockchain technology Authors are eminent academicians scientists researchers and scholars in their respective fields from across the world

Power Management Techniques for Integrated Circuit Design Ke-Horng Chen,2016-05-09 This book begins with the premise that energy demands are directing scientists towards ever greener methods of power management so highly integrated power control ICs integrated chip circuit are increasingly in demand for further reducing power consumption A timely and comprehensive reference guide for IC designers dealing with the increasingly widespread demand for integrated low power management Includes new topics such as LED lighting fast transient response DVS tracking and design with advanced technology nodes Leading author Chen is an active and renowned contributor to the power management IC design field and has extensive industry experience Accompanying website includes presentation files with book illustrations lecture notes simulation circuits solution manuals instructors manuals and program downloads

Fundamentals of Electrical Control Clarence A. Phipps,1999 Familiarizes electricians with relay ladder logic and then transitions to programmable logic controllers for similar installations A new chapter covers heat and enclosures including information on the creation of heat in electronic devices and how it can be dissipated Distributed by Prentice Hall Annotation copyrighted by Book News Inc Portland OR

Aktivhaus - The Reference Work Manfred Hegger,Caroline Fafflok,Johannes Hegger,Isabell Passig,2016-04-25 The first comprehensive reference work on energy independent Active Houses The Active House is a logical development of existing building standards It draws renewable energy from the sun and wind in order to cover energy needs as completely as possible The basic ideas of the Active House are described in detail in this standard work and serve as a planning guide for all parties involved in the construction of Active Houses From the principles of sustainable and energy efficient construction to planning tools and technical details the reader learns what constitutes active houses how they developed and the components required for its construction Active House architecture is illustrated by fourteen built works in the areas of residential non residential new construction and renovation
