Intelligent and Fuzzy Techniques: Smart and Innovative Solutions Cengiz Kahraman, Sezi Cevik Onar, Basar Oztaysi, Irem Ucal Sari, Selcuk Cebi, A. Cagri Tolga, 2020-07-10 This book gathers the most recent developments in fuzzy machine learning risk assessment heuristics and clustering the book is a valuable resource for academics M Sc and Ph D students as well as managers and engineers in industry and the service sectors

Intelligent and Fuzzy Techniques in Aviation 4.0 Cengiz Kahraman, Serhat Aydın, 2021-08-26 This book offers a comprehensive reference guide for the theory and practice of intelligent and fuzzy techniques in Aviation 4.0 It provides readers with the necessary intelligent and fuzzy tools for Aviation 4.0 when incomplete vague and imprecise information or insufficient data exist in hand where classical modeling approaches cannot be applied The respective chapters written by prominent researchers explain a wealth of both basic and advanced concepts including baggage services catering services check in and boarding services maintenance and cargo management security etc To foster reader comprehension all chapters include relevant numerical examples or case studies Taken together they form an excellent reference guide for researchers lecturers and postgraduate students pursuing research on Aviation 4.0 Moreover by extending all the main aspects of Aviation 4.0 to its intelligent and fuzzy counterparts the book presents a dynamic snapshot of the field that is expected to stimulate new directions ideas and developments

Intelligent Vehicles and Materials Transportation in the Manufacturing Sector: Emerging Research and Opportunities Bandyopadhyay, Susmita, 2017-07-12 The manufacturing industry has been optimized in recent years due to the rise of new technologies These advances have paved the way for the development of intelligent vehicles Intelligent Vehicles and Materials Transportation in the Manufacturing Sector Emerging Research and Opportunities is a pivotal source of scholarly research on the various aspects of manufacturing vehicles with intelligent technology components Including a range of perspectives on topics such as material handling automated guided vehicles and industrial robots this book is ideally designed for engineers academics professionals and practitioners actively involved in the manufacturing sector

Cost Management in Plastics Processing Robin Kent, 2017-09-29 Cost Management in Plastics Processing Strategies Targets Techniques and Tools Fourth Edition makes readers think about current practices and how to go forward with effective cost management This is a practical workbook that provides a structured approach to reducing costs in plastics processing for all the major plastics shaping processes moulding extrusion forming as well as elsewhere in the company e g in factory services and non manufacturing areas Competition in all manufacturing sectors is increasing and there is continuous pressure to drive costs down and to increase cost management Good cost management improves profits and margins improves management control and opens the door to becoming a world class company The approach throughout this book looks rigorously at where costs are incurred and proposes projects and targets for cost reduction This book is designed to provide a well structured map broken down into simple tasks and achievable goals This book offers a structured approach to the

techniques of cost management from how costs are calculated by accountants to the effective use of machines and labor to the minimization of waste. It begins by looking at traditional methods of accounting and costing and whether these are helpful or accurate for project management. Practical examples of cost management in plastics processing are included together with many useful flow charts and diagrams to illustrate the points under discussion. Enables plastics processors to institute an effective cost management system going beyond simply trying to cut costs. Provides a holistic perspective on cost management shining a light on areas on costs which may not have previously been considered or accounted for and proposing projects and targets for cost reduction. Serves as a route map to help companies move toward improved margins and greater profitability. Electrical Trade Practices 2nd edition Ralph Berry, Frank Cahill, Phillip Chadwick, 2019-02-01. Written to the core practical units of competency from the UEE11 Electrotechnology Training Package. Electrical Trade Practices 2e by Berry Cahill and Chadwick provides a practical yet comprehensive companion text covering the practical units within the UEE30811 Certificate III in the Electrotechnology Electrician qualification. Electrical Trade Practices is the practical volume to accompany Phillips Electrical Principles. **Sustainable Development Using Geospatial Techniques** Disha Thakur, Sanjay Kumar, Har Amrit Singh Sandhu, Chander Prakash, 2024-09-26. This book is a must have for anyone interested in leveraging geospatial technology as it covers a wide range of applications and offers valuable insights into the mapping visualization and analysis of natural resource planning using GIS remote sensing and GPS. Geospatial technology (GT) is a combination of geographic information systems (GIS), remote sensing (RS) and the global position system (GPS) for the mapping visualization and analysis of natural resource planning. Nowadays GIS is widely used throughout the globe for a wide range of applications. GIS is a system that combines locations, geography, hardware, software, statistics, planning and digital mapping. GIS is a system in which one can store, manipulate, analyze and visualize or display spatial data. The basic components of GIS are hardware, software, data, input and manpower. One can develop spatial, temporal and dynamic models using GIS which may help in effective decision making. Tools: Geospatial information is a computer programme that collects, stores, verifies and presents information on locations on the surface of the Earth. Geographical information systems play a key role in sustainable development. Geospatial technology combines traditional database operations like query and statistical analysis with the specific graphical and geographic analytical capabilities offered by maps. *Smart Ports* Weijian Mi, Yuan Liu, 2022-03-12. This book demonstrates the concept of ecological system of the smart ports. The innovation is emphasized as the essence of the ecological system as well as the prerequisite and foundation of sustainable development of smart ports. The main supporting technologies of smart ports including cyber physical system, middle office system, blockchain, artificial intelligence, machine vision, AR, VR, system simulation and emulation, digital monitoring and diagnosis etc. are introduced with concepts and development descriptions as well as practical application cases. It could be used as demonstration and reference for the administrative staff, engineers and technicians as well as researchers in construction and operation of smart

ports **Encyclopedia of Microfluidics and Nanofluidics** Dongqing Li, 2008-08-06 Covering all aspects of transport phenomena on the nano and micro scale this encyclopedia features over 750 entries in three alphabetically arranged volumes including the most up to date research insights and applied techniques across all areas Coverage includes electrical double layers optofluidics DNC lab on a chip nanosensors and more *Advances in Manufacturing Technology XXXII* Keith Case, 2018-08-15 The urgent need to keep pace with the accelerating globalization of manufacturing in the 21st century has produced rapid advancements in technology research and innovation This book presents the proceedings of the 16th International Conference on Manufacturing Research incorporating the 33rd National Conference on Manufacturing Research ICMR 2018 held in Skövde Sweden in September 2018 The aim of the conference is to create a friendly and inclusive environment bringing together researchers academics and industrialists with practical and theoretical knowledge to share and discuss emerging trends and new challenges The book is divided into 12 parts covering areas such as the manufacturing process robots product design and development smart manufacturing and lean among others Covering both cutting edge research and recent industrial applications the book will appeal to all those with an interest in recent advances in manufacturing technology **INDUSTRY 4.0** Dr.K.A.Balasubramaniam, Mrs.L. Intelligent Computing and Communication Techniques Arvind Dagur, Karan Singh, Pawan Singh Mehra, Dharendra Kumar Shukla, 2025-06-10 This book contains a prolific compilation of research papers presented at the International Conference on Intelligent Computing and Communication Techniques ICICCT 2024 Some of its key features include In depth coverage of artificial intelligence blockchain and their role in enhancing smart living and security with a focus on intelligent computing Depiction of detailed system models and architecture to illustrate the practical applications of AI Discussion on the role of AI and blockchain in banking healthcare navigation communication security etc Analysis of the challenges and opportunities presented by intelligent computing communication techniques and blockchain in healthcare education banking and related industries It is designed for academics researchers students and professionals seeking to expand their knowledge and engage with current research on artificial intelligence secure transactions real time monitoring and security **Recent Advances in Intelligent Manufacturing** Harish Kumar, Prashant K. Jain, Saurav Goel, 2023-07-21 The book presents the select proceedings of the International Conference on Advancement in Manufacturing Engineering ICAME 2022 held at

National Institute of Technology Delhi India during September 23 2022 It discusses the latest research in the area of industrial and production engineering Various topics covered in this book are precision engineering additive manufacturing computer aided manufacturing digital manufacturing intelligent control systems and optimization flexible manufacturing system smart manufacturing hybrid machining smart materials polymers ceramics and composites and their processing energy harvesting materials design thinking and prototyping product life cycle strategies Industry 4.0 etc The book is useful for researchers and professionals working in the area of industrial and production engineering

Facial-Oral Tract Therapy (F.O.T.T.) Ricki Nusser-Müller-Busch, Karin Gampp Lehmann, 2020-11-07 The book offers a comprehensive approach to the assessment and treatment of disturbances in facial expression oral movement swallowing breathing voice and speech production caused by developmental and acquired neurological conditions The principles outlined are used in patients with different etiologies e.g. stroke tumors traumas F.O.T.T. developed by Kay Coombes is a hands-on approach based on an understanding of neurological functions and the way we learn from experience The approach aims to give the patient experience of physiological posture and movement using facial oral functions in normal activities of daily living ADL Rather than mere exercises F.O.T.T. involves meaningful activities aiming to promote participation according to ICF criteria Four main areas are covered nutrition oral hygiene nonverbal communication and speech Each chapter summarises the problems of severely ill patients and shows the clinical reasoning behind the solutions offered Separate chapters discuss tracheostomy management and the training of the carers involved including relatives The chapter authors are experienced specialists physio occupational and speech language therapists and physicians whose contributions aim to provide interdisciplinary perspectives and translate latest research into clinical practice

Intelligent Techniques and Applications in Science and Technology Subhojit Dawn, Valentina Emilia Balas, Anna Esposito, Sadhan Gope, 2020-03-02 This book provides innovative ideas on achieving sustainable development and using green technologies to conserve our ecosystem Innovation is the successful exploitation of a new idea Through innovation we can achieve MORE while using LESS Innovations in science technology will not only help mankind as a whole but also contribute to the economic growth of individual countries It is essential that the global problem of environmental degradation be addressed immediately and thus we need to rethink the concept of sustainable development Indeed new environmentally friendly technologies are fundamental to attaining sustainable development The book shares a wealth of innovative green technological ideas on how to preserve and improve the quality of the environment and how to establish a more resource efficient and sustainable society The book provides an interdisciplinary approach to addressing various technical issues and capitalizing on advances in computing optimization for scientific technological development smart information communication bio monitoring smart cities food quality assessment waste management environmental aspects alternative energies sustainable infrastructure development etc In short it offers valuable information and insights for budding engineers researchers upcoming young minds and industry professionals

promoting awareness for recent advances in the various fields mentioned above *Computational Thinking Education* Siu-Cheung Kong, Harold Abelson, 2019-07-04 This book is open access under a CC BY 4.0 license This book offers a comprehensive guide covering every important aspect of computational thinking education It provides an in depth discussion of computational thinking including the notion of perceiving computational thinking practices as ways of mapping models from the abstraction of data and process structures to natural phenomena Further it explores how computational thinking education is implemented in different regions and how computational thinking is being integrated into subject learning in K 12 education In closing it discusses computational thinking from the perspective of STEM education the use of video games to teach computational thinking and how computational thinking is helping to transform the quality of the workforce in the textile and apparel industry A Comprehensive Guide for Web3 Security Ken Huang, Dyma Budorin, Lisa JY Tan, Winston Ma, Zhijun William Zhang, 2023-12-27 With the recent debacle of cryptocurrency exchange FTX and the crypto trading company Alameda Research the importance of comprehending the security and regulations of Web3 cryptocurrency and blockchain projects has been magnified To avoid similar economic and security failures in future Web3 projects the book provides an essential guide that offers a comprehensive and systematic approach to addressing security concerns Written by experts in tech and finance it provides an objective professional and in depth analysis of security and privacy issues associated with Web3 and blockchain projects This book highlights the security related to foundational Web3 building blocks such as blockchain crypto wallets smart contracts and token economics and describes recommended security processes and procedures for Web3 application development such as DevSecOps data analytics and data authenticity via the oracle Moreover the book discusses the legal and regulatory aspects of Web3 and the reasons behind the failures of well known Web3 projects It also contains detailed case studies of web3 projects analyses of the reasons for their failures and some pending legal cases This book is an excellent resource for a diverse range of readers with particular appeal to web3 developers architects project owners and cybersecurity professionals seeking to deepen their knowledge of Web3 security *Machine Learning Techniques for Smart City Applications: Trends and Solutions* D. Jude Hemanth, 2022-09-19 This book discusses the application of different machine learning techniques to the sub concepts of smart cities such as smart energy transportation waste management health infrastructure etc The focus of this book is to come up with innovative solutions in the above mentioned issues with the purpose of alleviating the pressing needs of human society This book includes content with practical examples which are easy to understand for readers It also covers a multi disciplinary field and consequently it benefits a wide readership including academics researchers and practitioners Data-Driven Approaches for Efficient Smart Grid Systems Jinran Wu, Yang Yang, Shaolong Sun, Yang Yu, 2025-03-26 This Research Topic aims to highlight the exciting potential of innovative forecasting methods and their practical applications using machine learning in smart grid systems SGSs Machine learning techniques which encompass traditional neural networks and advanced deep learning

methods have gained significant attention for their ability to address the complex challenges within SGSs and simultaneously improve cost effectiveness. It is important to note that when machine learning models are employed in SGSs they primarily focus on forecasting. This emphasis is grounded in the models' impressive capability to accurately replicate the intricate dynamics that characterize smart grid systems. By harnessing these forecasting models, researchers and practitioners are equipped with a valuable tool to better understand and predict the behavior of SGSs. This not only contributes to academic advancements but also enhances the practical implementation of smart grid technologies.

Future Access Enablers for Ubiquitous and Intelligent Infrastructures Dragan Perakovic, Lucia Knapcikova, 2021-06-19. This book constitutes the refereed post conference proceedings of the 5th International Conference on Future Access Enablers for Ubiquitous and Intelligent Infrastructures FABULOUS 2021 held in May 2021. Due to COVID-19 pandemic the conference was held virtually. This year's conference topic covers security of innovative services and infrastructure in traffic transport and logistic ecosystems. The 30 revised full papers were carefully reviewed and selected from 60 submissions. The papers are organized in thematic sessions on Internet of things and smart city smart environment applications information and communications technology smart health applications sustainable communications and computing infrastructures.

Blockchain and IoT Integration Kavita Saini, 2021-10-28. As technology continues to advance and the interconnection of various devices makes our lives easier, it also puts us at further risk of privacy and security threats. Phones can connect to household devices to help set alarms, turn on or off the lights, and even preheat ovens. The Internet of Things (IoT) is this symbiotic interplay of smart devices that collect data and make intelligent decisions. However, the lack of an intrinsic security measure within IoT makes it especially vulnerable to privacy and security threats. Blockchain and IoT Integration highlights how Blockchain, an encrypted distributed computer filing system, can be used to help protect IoT against such privacy and security breaches. The merger of IoT and blockchain technology is a step towards creating a verifiable, secure, and permanent method of recording data processed by smart machines. The text explores the platforms and applications of blockchain-enabled IoT as well as helps clarify how to strengthen the IoT security found in healthcare systems as well as private homes. Other highlights of the book include: Overview of the blockchain architecture; Blockchain to secure IoT data; Blockchain to secure drug supply chain and combat counterfeits; Blockchain IoT concepts for smart grids, smart cities, and smart homes; A biometric-based blockchain-enabled payment system; IoT for smart healthcare monitoring systems.
