 - Mount the SmartStart module as high as possible in the vehicle (the engraved side faces up for GPS devices). Mount with minimal

obstructions that can affect communications and within reach of the main Directed system using the provided cables (do not extend).

The module's signal strength (RSSI) can be viewed in the activation panel after a successful transmission test.

- 50 to -90 dB = good signal strength
- 91 to -100 dB = borderline/inconsistent signal strength
- > -100 dB = weak, insufficient signal strength
