Allan Freeze, 2023-04-28 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion breeds reaction The Environmental Pendulum provides a thoughtful and evenhanded assessment of this conflict Tens of thousands of sites across the country are contaminated with toxic chemicals Environmentalists warn us that this legacy of carelessness is seriously affecting both human health and the ecological balance of nature They point out that even improved industrial practices will not eliminate future chemical releases to the environment Their demand for regulatory control has received wide public support and led to the passage of the Superfund legislation in 1980 Now after twenty years the value of the Superfund program is being challenged by corporate America which argues that excessive cleanup costs have the potential to bankrupt the nation R Allan Freeze outlines the difficulties associated with the management of hazardous waste and offers a balanced account of the controversy over the role of environmental contamination in human health Freeze clarifies what matters and what doesn't with respect to chemical contaminants in the environment arguing that environmental policies should be based on an accurate appraisal of the risks associated with these toxins He concludes the book with a brilliant summation of the good news and the bad news of environmental pollution describing what can and can't be done to bring the situation under control This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 2000 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion breeds reaction The Environmental Pe

Dioxane Sneaks In Michael Brown,Al,2025-02-27 Dioxane Sneaks In exposes the alarming presence of 1,4-dioxane a likely carcinogenic byproduct found in common household and personal care products like detergents and shampoos This chemical contaminant formed during a manufacturing process called ethoxylation poses significant public health risks due to inadequate

regulations and widespread exposure The book argues for greater transparency stricter rules and safer manufacturing alternatives to protect consumers It highlights the surprising fact that many people are unknowingly exposed to this chemical daily despite its link to increased cancer risks and the availability of methods to minimize its formation The book progresses by first explaining the science behind 1,4-dioxane's toxicity then scrutinizing the regulatory loopholes that allow its continued presence in consumer goods and even drinking water It further investigates the manufacturing processes revealing the use of ethoxylation and exploring alternative methods Through scientific studies government reports and real world examples it connects the dots between exposure and potential health consequences The book offers a solution oriented approach providing practical guidelines for consumers health advocates and policymakers to identify risky products reduce exposure and advocate for safer alternatives
