The Cigarette Papers Stanton A. Glantz, 1996 These documents provide a shocking inside account of the activities of one tobacco company Brown Williamson and its multinational parent British American Tobacco over more than thirty years

Smoking and Health Bulletin, 1976 **How Tobacco Smoke Causes Disease** United States. Public Health Service. Office of the Surgeon General, 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies Mechanisms of disease are important because they may provide plausibility which is one of the guideline criteria for assessing evidence on causation This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke This evidence is relevant to understanding how smoking causes disease to identifying those who may be particularly susceptible and to assessing the potential risks of tobacco products *The Effect* Nick Huntington-Klein, 2025-07-09 The Effect An Introduction to Research Design and Causality Second edition is an excellent teaching text about research design specifically concerning research that uses observational data to make a causal inference It is separated into two halves each with different approaches to that subject The first half goes through the concepts of causality with very little in the way of estimation It introduces the concept of identification thoroughly and clearly and discusses it as a process of trying to isolate variation that has a causal interpretation Subjects include heavy emphasis on data generating processes and causal diagrams Concepts are demonstrated with a heavy emphasis on graphical intuition and the question of what we do to data When we add a control variable what does that actually do The target audience is practitioners as well as undergraduate and graduate students studying causal inference in various fields such as statistics econometrics biostatistics the social sciences and data science Key Features Extensive code examples in R Stata and Python Chapters on heterogeneous treatment effects simulation and power analysis new cutting edge methods and uncomfortable ignored assumptions An easy to read conversational tone Up to date coverage of methods with fast moving literatures like difference in differences The second edition features a new chapter on partial identification updated materials methods and writing throughout and additional materials for help navigating the book or in using the book in teaching A Student Guide to College Composition William Murdick, 2011-07 This book helps students succeed in composition by showing them How to be effective students How to handle the most difficult challenges of academic writing How to approach the most common writing assignments How to pass a timed writing test William Murdick has a Ph D in rhetoric and is the author of three other writing textbooks The Portable Business Writer Houghton Mifflin 1999 and The Portable Technical Writer Houghton Mifflin 2001 and College Writing A First Course Writing and Reasoning Jain 2006 Note on the Second Edition This expanded Second Edition includes full chapter treatments of the
