Information Structure in a Cross-Linguistic Perspective, 2016-08-29 The present volume draws together contributions from a number of scholars with an interest in empirical cross linguistic description Most of the papers were first presented at the symposium Information Structure in a Cross linguistic Perspective held in Oslo in November December 2000 The descriptions are functionally oriented and their common focus is how information structure in a broad sense can be compared across languages Information structure has been approached in a variety of ways by the authors so as to give a broad picture of this fundamental principle of text production involving the way in which a speaker writer chooses to present a message in terms of given new information focus cohesion and point of view Central to much of the research is the problem of establishing criteria for isolating linguistic constraints on language use from cultural linguistic conventions in text production The linguistic comparison includes English German and or one of the Scandinavian languages with sidelights to other languages Most of the papers are text or corpus based and the ongoing work on parallel corpora in Scandinavia is reflected in several contributions

The Architecture of Focus Valéria Molnár, Susanne Winkler, 2011-12-22 This collection investigates the architecture of focus in linguistic theory from different theoretical perspectives Research on focus and information structure in the last four decades has shown that the phenomenon of focus is highly complex the theoretical approaches manifold and the data highly sensitive The main emphasis has been placed on the integration of the notion of focus in generative grammar In recent years however the approaches to focus and information structure underwent a radical change in perspective The theoretical concept of focus its related terms and phenomena became the object of research Along with it the research questions shifted instead of locating focus in the architecture of grammar linguists investigate the architecture of focus itself The central underlying idea of this collection is to document this change in perspective with the aim of isolating essential keystones and research areas in both the theoretical and empirical domain The book is structured accordingly Following the introduction there are four main sections The general section discusses the theoretical foundations of focus within grammar The second section hosts papers which investigate the representation of focus and topic at the syntax pragmatics interface The third section discusses the phonological representation of focus and its relation to meaning The papers of the final section investigate different types of focus constructions in a variety languages The collection of papers on the architecture of focus its interpretation and representation mirror the establishment of the focus research field

The Yoga of Divorce Mike MacConnell, 2016-09-09 So far lawyers are the only ones getting any money There s no middle ground We only talk through lawyers I open my mouth and we end up screaming at each other Sound familiar What if there was a way to divorce with a minimum of hostility time and expense It is attainable even if you are working towards these goals without the cooperation of your spouse The Yoga of Divorce advocates that we shift our

reactions and embrace the notion of cooperative opposition the idea that the same non adversarial process that works on the yoga mat can be used at the negotiation table The key to The Yoga of Divorce s strategy is to park ego at the door If we stop trying to win but instead seek a solution that is fair to both sides we make much smoother progress The mindful practice of cooperative opposition can simultaneously resolve physical stress and social conflict by intentionally balancing opposite forces It might seem simple but it takes conscious effort We urgently need to make calm decisions at those times when being calm is most difficult such as in the midst of emotional crisis When stakes are highest we feel most triggered to attack For the sake of our children our wealth and our personal well being we need to work past negative emotions and put ego in its place Only then will we find lasting peace and amicable resolutions **The Oxford Guide to Literature in English**

Annotation, exploitation and evaluation of parallel corpora: TC3 I Silvia Hansen-Schirra , Stella Neumann , Oliver Čulo ,2017-02-27 Exchange between the translation studies and the computational linguistics communities has traditionally not been very intense Among other things this is reflected by the different views on parallel corpora While computational linguistics does not always strictly pay attention to the translation direction e g when translation rules are extracted from sub corpora which actually only consist of translations translation studies are amongst other things concerned with exactly comparing source and target texts e g to draw conclusions on interference and standardization effects However there has recently been more exchange between the two fields especially when it comes to the annotation of parallel corpora This special issue brings together the different research perspectives Its contributions show from both perspectives how the communities have come to interact in recent years
