Energy

- Energy is the ability to do work or move an object with force.
- Sound moves the air (or matter) around us.
- Sound occurs when an object is vibrated by force.
- Sound is a type of energy.

Vibration

For sound to be produced, an object (or matter) needs to be vibrated or moved by a force.

Sound Waves

The initial force used to make a sound vibrates the matter surrounding it in a chain reaction and creating waves.

How Are Sounds Different from Each Other?

Sounds can have different pitches, frequencies, amplitudes, or wavelengths, so they sound different to our ears.

How We Hear Sound

The vibrations caused by the initial object being vibrated reach our eardrums. In comparison with our natural ear drums, our eardrums let us know that we hear a sound.
