Aleksi Ylönen, Jan Záhořík

South African Air Force Application Forms 2016:

Air Power in the Indian Ocean and the Western Pacific Howard M. Hensel, 2020-06-04 This book examines the security dynamics of the Indian Ocean and the Western Pacific concentrating upon an analysis and evaluation of the air power capabilities of the various powers active in the two regions The volume is designed to help improve understanding of the heritage and contemporary challenges confronting the global community in the Indian Ocean and the Western Pacific as well as to illuminate the policies of the various powers involved in the affairs of these regions and the military capabilities that are available in support of those policies The 16 individual chapters examine both the traditional and the non traditional threats that confront the various Indian Ocean and Western Pacific powers and assess the roles played by land based and naval fixed wing and rotary wing manned and unmanned aircraft as well as by offensively and defensively capable ballistic and cruise missiles in addressing these challenges In doing so the various chapters analyze and evaluate the air power doctrine capabilities deployment patterns and missions of the respective states In addition they assess the future issues challenges and responses involving air power as it acting in concert with other military instruments seeks to contribute to securing and promoting the interests of the state This book will be of much interest to students of air power strategic studies Asian and Middle Eastern politics and International Relations

20 Battles Evert Kleynhans, David Brock Katz, 2023-07-28 Favours manoeuvre over attrition and often punching above their weight South African soldiers have become known for their tenacity dash and ability to defy the odds Their unique directive command style has also helped them to excel in defining battles and operations from the campaign in German South West Africa in 1915 to the cross border operations in Angola during the Border War In *20 Battles* military historians Evert Kleynhans and David Brock Katz investigate the evolution of South Africa's armed forces over a century from 1913 to 2013 They track the evolution of the doctrine and structure of the defence force uncovering historical continuity and the lessons learned from past battles and operations What is clear is that when South African soldiers have the freedom to operate according to their manoeuvre doctrine as they had in East Africa in 1916 and southern Ethiopia in 1941 they can achieve stunning results But when hemmed in by rigid doctrine and a top down command style as at Delville Wood in 1916 and Tobruk in 1942 the results can be tragic *20 Battles* combines both battlefield drama and crisp analysis and in the process provides a much needed perspective on the South African way of war

Unconventional Water Resources Manzoor Qadir, Vladimir Smakhtin, Sasha Koo-Oshima, Edeltraud Guenther, 2022-05-26 The world is faced with a growing number of complex and interconnected challenges Water is among the top 5 global risks in terms of impacts which would be far reaching beyond socio economic challenges impacting livelihoods and wellbeing of the people As freshwater resources and population densities are unevenly distributed across the world some regions and countries are already water scarce Water scarcity is expected to intensify in regions like the Middle East and North Africa MENA which has 6% of the global population but only 1% of the world's freshwater resources Climate change adds to this complexity as it is leading to rainfall uncertainty and extended droughts periods mostly in arid areas Increasing water scarcity is now recognized as a major cause of conflict social unrest and migration and at the same time water is increasingly considered as an instrument for international cooperation to achieve sustainable development Tapping and assessing sustainably every available option in water scarce areas is needed as pressure continues to build on limited

water resources The stark fact is that conventional water provisioning approaches relying on snowfall rainfall and river runoff are not enough to meet growing freshwater demand in water scarce areas Water scarce countries need a radical rethink of water resource planning and management that includes the creative exploitation of a growing set of viable but unconventional water resources for food production livelihoods ecosystems climate change adaption and sustainable development Unconventional water resources are generated as a by product of specialized processes need suitable pre use treatment require pertinent on farm management when used for irrigation or result from a special technology to collect access water

Military Assistance on Request and the Use of Force Erika De Wet, 2020-03-26 In countries such as Syria Iraq South Sudan and Yemen internationally recognized governments embroiled in protracted armed conflicts and with very little control over their territory have requested direct military assistance from other states These requests are often accepted by the other states despite the circumvention of the United Nations Security Council and extensive violation of international humanitarian law and human rights In this book Erika De Wet examines the authority entitled to extend a request for or consent to direct military assistance as well as the type of situations during which such assistance may be requested notably whether it may be requested during a civil war Ultimately De Wet addresses the question of if and to what extent the proliferation of military assistance on the request of a recognized government is changing the rules in international law applying to the use of force

The Economics of Defense Industry Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis

A Strange Campaign Russell Phillips, 2021-05-05 Madagascar provided the stunning backdrop for one of the strangest conflicts of the Second World War when Britain went head to head against one of its closest allies When British forces landed on the island in 1942 the enemy they faced wasn't German Japanese or even Italian this time the opposing forces were French Concerned that Japan might use Madagascar as a strategic base to disrupt the supply line to India Britain was keen to take control of the island However the Vichy forces were keen to defend the French colony and prevent it becoming part of the British Empire A Strange Campaign The Battle for Madagascar gives a detailed account of this fascinating but little known period of military history Even at the time the conflict was a controversial one pitting two colonial empires against each other However it was also ground breaking as it was the first time Allied forces had staged a major amphibious invasion The lessons learned on the shores of Madagascar would prove to be invaluable two years later during the D day landings in Normandy Military historian Russell Phillips examines the tactics used in the battle for Madagascar which included secret agents dummy paratroopers and attempted bribery But just how did the British finally break down months of resistance by the French And how did a tug of war over an island in the middle of the Indian ocean influence the rest of the Second World War Russell Phillips gives us a well researched enlightening and skillfully detailed account of a little known but clearly pivotal WWII operation that's suited for both curious laypersons and serious researchers Steve Anderson author of the Kaspar Brothers series and other WWII era novels Though it was a world war it is easy to overlook some corners of the conflict Madagascar was strategically important and controlled by Vichy France Phillips has done an excellent job drawing out the story of the British led invasion of the island Angus Wallace host of the WW2 Podcast
