Brand loyalty is significant for the business growth and expansion of companies in the electronics sector. A populated country Bangladesh has a substantial expenditure on electronic appliances, and the demand for these household items increases over the period; however, customers are not always loyal to a particular brand. Due to the technological advance of social media technology, it has an essential role in the customer's decision to buy household appliances. The existing literature has not focused on this massive demand for electronic appliances, customer satisfaction, loyalty, trust, and social media's significant role in consumer buying behavior. The book shoed the investigation of the effect of customer satisfaction and brand trust of electronic home appliances on brand loyalty and the mediating role of brand trust in customer satisfaction and trust relationship. The study also examined the extent to which customers believe social media information influences them. The study gathered data from 523 Bangladeshi respondents from Dhaka by conducting a survey.
