Significant and rapid social, political, technological, and economic changes are taking place in the world economy, and it is increasingly recognised that accountants in all countries play a key role in the process of economic development. Accounting education is undergoing a thorough review on a worldwide basis, and major developments are taking place to produce quality accounting education that can keep pace with dramatic world change. This book provides an up-to-date view of the state of accounting education throughout the world and focusses on the global challenges facing accounting education as we approach the millennium.
