Taboo Issues in Social Science Anthony Walsh,2020-10-06 This book is an expedition into a number of controversial issues in the social sciences with the intention of challenging the conventional wisdom on those issues While most social science research is interesting and important a fair amount of social science research is thinly disguised advocacy research in which conclusions too often precede inquiries The primary topics are those that the journal *Nature* described as Taboo In order of the degree of censure the topics are race sex differences intelligence and violence The only way to examine these topics with the social science seal of approval attached is through a strictly environmental lens To bring biological factors to bear on them is politically incorrect and can bring the wrath of the academy down on one's head Although many researchers successfully bring biology into their research on these issues they are said to risk career and reputation for doing so Speech codes stifling free intellectual exchange pervade the ivory tower and an overwhelmingly liberal faculty hell bent on eliminating any vestiges of opposition to their ideology This is unconscionable in an institution that is supposed to value free exchange of all ideas and opinions The current state of academic social science is examined before entering the substantive realm to try to explore how the topics I explore have become protected from any claims of naturalness Because the left rejects the idea of human nature it insists that these things are products of social learning and or social construction and are entirely fluid To maintain this position in light of the huge and exponential successes of the natural sciences the left embraces such frames of reasoning as postmodernism radical relativism multiculturalism and political correctness all of which are examined in this book Also discussed are human nature whiteness studies political temperaments various criminal justice issues and capitalism versus socialism *Under Observation: The Interplay Between eHealth and Surveillance* Samantha Adams,Nadezhda Purtova,Ronald Leenes,2016-12-31 The essays in this book clarify the technical legal ethical and social aspects of the interaction between eHealth technologies and surveillance practices The book starts out by presenting a theoretical framework on eHealth and surveillance followed by an introduction to the various ideas on eHealth and surveillance explored in the subsequent chapters Issues addressed in the chapters include privacy and data protection social acceptance of eHealth cost effective and innovative healthcare as well as the privacy aspects of employee wellness programs using eHealth the use of mobile health app data by insurance companies advertising industry and law enforcement and the ethics of Big Data use in healthcare A closing chapter draws on the previous content to explore the notion that people are under observation bringing together two hitherto unrelated streams of

scholarship interested in observation eHealth and surveillance studies In short the book represents a first essential step towards cross fertilization and offers new insights into the legal ethical and social significance of being under observation
