

CHAPTER 3

The Accounting Information System

ANSWERS TO QUESTIONS

1. Examples are:
 - (a) Payment of accounts payable.
 - (b) Collection of accounts receivable from a customer. Also, a purchase of supplies or equipment for cash.
 - (c) Conversion of accounts payable to note payable.

LO: 1, Bloom: K, Difficulty: Simple, Time: 3-5, AICPA BB: Communication, AICPA FC: Reporting, AICPA PC: None

2. Transactions (a), (b), (d) are considered business transactions and are recorded in the accounting records because a change in assets, liabilities, and/or owners'/stockholders' equity has been effected as a result of a transfer of values from one party to another. Transactions (c) and (e) are not business transactions because a transfer of values has not resulted, nor can the event be considered financial in nature and capable of being expressed in terms of money.

LO: 1, Bloom: K, Difficulty: Simple, Time: 3-5, AICPA BB: Communication, AICPA FC: Reporting, AICPA PC: None

3. Transaction (a): Accounts Receivable (debit), Service Revenue (credit).
Transaction (b): Cash (debit), Accounts Receivable (credit).
Transaction (c): Supplies (debit), Accounts Payable (credit).
Transaction (d): Delivery Expense (debit), Cash (credit).

LO: 1, 2, Bloom: K, Difficulty: Simple, Time: 3-5, AICPA BB: Communication, AICPA FC: Reporting, AICPA PC: None

4. Revenue and expense accounts are referred to as temporary or nominal accounts because each period they are closed out to Income Summary in the closing process. Their balances are reduced to zero at the end of the accounting period; therefore, the term temporary or nominal is given to these accounts.

LO: 1, Bloom: K, Difficulty: Simple, Time: 3-5, AICPA BB: Communication, AICPA FC: Reporting, AICPA PC: None

5. Andrea is not correct. The double-entry system means that for every debit amount there must be a credit amount and vice-versa. At least two accounts are affected and debits must equal credits. It does not mean that each transaction must be recorded twice.

LO: 1, Bloom: C, Difficulty: Simple, Time: 3-5, AICPA BB: Communication, AICPA FC: Reporting, AICPA PC: None

6. Although it is not absolutely necessary that a trial balance be prepared periodically, it is customary and desirable. The trial balance accomplishes two principal purposes:
 - (1) It tests the accuracy of the entries in that it proves that debits and credits of an equal amount are in the ledger.
 - (2) It provides a list of ledger accounts and their balances, which may be used in preparing the financial statements and in supplying financial data about the concern.

LO: 3, Bloom: C, Difficulty: Simple, Time: 3-5, AICPA BB: Communication, AICPA FC: Reporting, AICPA PC: None

7. (a) Real account; balance sheet.
(b) Real account; balance sheet.
(c) Inventory is generally considered a real account appearing on the balance sheet. (Note: Inventory has the elements of a nominal account when the periodic inventory system is used. It may appear on the income statement when the multiple-step format is used under a periodic inventory system.)
(d) Real account; balance sheet.
(e) Real account; balance sheet.

Frontier Emerging Equity Markets Securities Price Behavior and Valuation Oliver S. Kratz, 2007-08-28 *Frontier Emerging Equity Markets Securities Price Behavior and Valuation* uses the Russian example to illustrate the intricate mechanics of frontier emerging equity market analysis Frontier markets are those equity markets that do not benefit from the same degree of securities transparency and information dissemination as future emerging markets In many cases frontier equity markets are those which have been created almost literally overnight without the infrastructure and institutional readiness of the nations in which they are located During the 1990s frontier emerging markets have formed a new investment asset class which requires a very different set of valuation metrics from mature emerging markets In developing a multi stage approach to the understanding and valuing of such markets this book uses the case of the Russian frontier equity market to illustrate topics such as the relationship between equity market infrastructure and valuation during the genesis period of an emerging financial market evolving market efficiency and the crucial role of depository receipt programs in the development of these markets Further this book develops the first comprehensive framework for valuing a frontier equity market The role of equity risk premium as it affects early dynamic equity valuation is also covered in order to illuminate important drivers of securities price performance The book closes by discussing the philology of the frontier market valuation debate in which every market participant is an important purveyor of information and a contributor to the final valuation dimension of equities The main asset used to present the empirical concepts is a complete research database drawn from actual frontier market investing which previously had been unavailable to academic researchers As an active institutional asset management professional at a major Wall Street investment firm the author marries academic theories such as market efficiency and market segmentation to the real world of high stakes and high risk frontier market investing This book illustrates the applicability and in some cases the uselessness of financial theory when applied to this new and rising asset class It opens the discussion of equity valuation theory for an environment where many conventional rules of asset price determination need to be rewritten As the

first research level monograph exclusively dedicated to frontier emerging equity market analysis it offers a unique dual perspective on how academic financial research finds it a complementary and sometimes antagonistic counterpart of real life investment decision making This book can help both professional investors and students of finance to understand frontier equity market valuation and development [Energy Abstracts for Policy Analysis](#) ,1986 **Perspectives on Accounting and Finance in China (RLE Accounting)** John Blake,Simon S. Gao,2013-12-04 The rush of entrepreneurial activity in China has been watched with interest by the financial world This book the result of an international symposium on Chinese accounting and financial management assesses the little known accounting scene in China which up until 1978 remained behind closed doors Divided into four sections the volume covers Chinese perspectives on accounting the business and financial structure of China including the re emergence of a Chinese stock market the regulatory framework of accounting in China and comparisons with international accounting standards the impact of current reforms in Chinese accounting practice the emergence of a new accounting profession in China The concluding chapter provides an overview of the cultural context of the reforms which took place in the 1990s By using comparisons with other Asian countries accounting systems like Taiwan the contributors to the volume give an analysis of the state of accountancy in China during the 1990s *A Clash of Paradigms* Suan Maiava,2020-07-24 This title was first published in 2001 This study indicates that researchers have far to go in understanding and assessing how development projects work The author shows that often the perception of failure is not shared by those whom were intended to benefit She uses a case study of Samoan villagers introduced to cattle farming to examine the wider development process and challenge the conventional theories By drawing on people centred perspectives that give much greater weight to the role of culture in development the volume does not simply criticize development project management but suggests practical and positive ways forward encouraging spontaneous indigenous development which should be supported by projects where appropriate **Industrial Arts Index** ,1923 **Monthly Catalog of United States Government Publications** ,1982 [Business Information Processing Systems](#) Clarence Orville Elliott,Robert S.
