Homer's Iliad Claude Brügger, 2017-01-11 Research into traditional areas of Homeric scholarship e.g. language the structure of the text etc. has come a long way since the last comprehensive commentaries on the Iliad were carried out that is the commentary by Ameis Hentze in German language in the late nineteenth and early twentieth century as well as the Cambridge commentary by Kirk et al. in English language in the 1980-90s. Much of this kind of research is now set upon a much surer methodological and theoretical foundation. Developments in the field of Mycenaeanology and in the study of Linear B, oral poetry and the history of ancient Troy in particular have made possible a number of new insights and interpretive possibilities in Homer's epic. Moreover, modern secondary literature of all major languages has been systematically covered. The Basel Commentary to the Iliad is a new up-to-date standard work that addresses these issues directly and will be of interest to scholars, teachers and students alike. Central to the commentary on Iliad 24 is the interpretation of one of the most exciting and most moving scenes of the Iliad: how Priam, the king of Troy, makes his way to his mortal enemy Achilles, by whose hand his son Hector had fallen; how the god Hermes leads the old man almost magically into the army camp of the Greeks; how Achilles, at the end of an emotional encounter with Priam, leaves the body of Hector for burial.

A Brief Guide to Celtic Myths and Legends Martyn Whittock, 2013-10-03 A very readable guide which fills the gap between academic analysis and less critical retellings of the myths and legends. Martyn Whittock provides an accessible overview while also assessing the current state of research regarding the origins and significance of the myths. Since all records of the myths first occur in the early medieval period, the focus is on the survival of pre-Christian mythology and the interactions of the early Christian writers with these myths. A wide-ranging and enthralling introduction to Celtic mythology from the Irish gods before gods, the Fomorians to the children of Llyr, the sea deity, from the hunter-warrior Fionn mac Cumhaill, whose exploits are chronicled in the Fenian Cycle, to Cú Chulainn, the Hound of Ulster, and from the Welsh heroes of the Mabinogion to Arthur, King of Britain, though the mythical Welsh version who predates the medieval legends.

The Marvelous Clouds John Durham Peters, 2015-06-19 An ambitious re-writing, a re-synthesis even of concepts of media and culture. It is nothing less than an attempt at a history of Being Los Angeles. Review of Books. When we speak of clouds these days it is as likely that we mean data clouds or network clouds as cumulus or stratus. In their sharing of the term, both kinds of clouds reveal an essential truth: that the natural world and the technological world are not so distinct. In *The Marvelous Clouds* John Durham Peters argues

that though we often think of media as environments the reverse is just as true environments are media Peters defines media expansively as elements that compose the human world Drawing from ideas implicit in media philosophy Peters argues that media are more than carriers of messages they are the very infrastructures combining nature and culture that allow human life to thrive Through an encyclopedic array of examples from the oceans to the skies *The Marvelous Clouds* reveals the long prehistory of so called new media Digital media Peters argues are an extension of early practices tied to the establishment of civilization such as mastering fire building calendars reading the stars creating language and establishing religions New media do not take us into uncharted waters but rather confront us with the deepest and oldest questions of society and ecology how to manage the relations people have with themselves others and the natural world A wide ranging meditation on the many means we have employed to cope with the struggles of existence from navigation to farming meteorology to Google *The Marvelous Clouds* shows how media lie at the very heart of our interactions with the world around us **The Neural**
