Accounting Principles is the standard framework for guidelines for financial accounting used in any given jurisdiction. It includes the standards, conventions and rules that accountants follow in recording and summarising and in the preparation of financial statements. On the other hand, IFRS (International Financial Reporting Standards) is a set of international accounting standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued by the International Accounting Standards Board (IASB). With IFRS becoming more widespread on the international scene, consistency in financial reporting has become more prevalent between global organisations. To maximise student achievement, a plethora of additional teaching and learning resources will be available, including self-tests, exercises, templates, videos and more. Using metric units and companies with a more global feel, this new text is ideal for courses across the world. Financial Reporting under IFRS Wolfgang Dick, Franck Missonier-Piera, 2010-10-11. The International Financial Reporting Standards are quite different from other sets of accounting standards and are fundamentally different from US GAAP in that they are based on principles and not on detailed rules. Financial Reporting under IFRS: A topic-based approach offers a global perspective on IFRS by

presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements through examples, activities, questions and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links and the accounting mechanisms used to prepare them. Section two deals with the identification, evaluation and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book, special topics are covered, including Derivatives and Hedge accounting, IAS 39 Business Combination, IFRS 3 and Operating Segments, IFRS 8 Financial Reporting. Under IFRS is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments, will benefit from its concise, topic-based approach. **Financial Accounting: IFRS, 4e Wiley E-Text:**

Walton, 2009. International Financial Reporting Standards (IFRS) are becoming the benchmark accounting standards for companies listed on international stock exchanges. The SEC treats them as equivalent of US Generally Accepted Accounting Principles (GAAP) and is even contemplating allowing their use instead of US GAAP. They are mandatory in Europe, Australia, and South Africa. Canada, China, Brazil, Japan, and India are planning to use them from 2011. Anybody interested in companies listed on the US stock exchanges needs to know something about them because hundreds of foreign companies are already using them to report in the US. Anybody interested in international business has to know these benchmark financial reporting rules.
