The Zen of Magic Squares, Circles, and Stars Clifford A. Pickover, 2011-11-28 Humanity's love affair with mathematics and mysticism reached a critical juncture legend has it on the back of a turtle in ancient China As Clifford Pickover briefly recounts in this enthralling book the most comprehensive in decades on magic squares Emperor Yu was supposedly strolling along the Yellow River one day around 2200 B.C. when he spotted the creature its shell had a series of dots within squares To Yu's amazement each row of squares contained fifteen dots as did the columns and diagonals When he added any two cells opposite along a line through the center square like 2 and 8 he always arrived at 10 The turtle unwitting inspirer of the Yu square went on to a life of courtly comfort and fame Pickover explains why Chinese emperors Babylonian astrologer priests prehistoric cave people in France and ancient Mayans of the Yucatan were convinced that magic squares arrays filled with numbers or letters

in certain arrangements held the secret of the universe Since the dawn of civilization he writes humans have invoked such patterns to ward off evil and bring good fortune Yet who would have guessed that in the twenty first century mathematicians would be studying magic squares so immense and in so many dimensions that the objects defy ordinary human contemplation and visualization Readers are treated to a colorful history of magic squares and similar structures their construction and classification along with a remarkable variety of newly discovered objects ranging from ornate inlaid magic cubes to hypercubes Illustrated examples occur throughout with some patterns from the author s own experiments The tesseracts circles spheres and stars that he presents perfectly convey the age old devotion of the math minded to this Zenlike quest Number lovers puzzle aficionados and math enthusiasts will treasure this rich and lively encyclopedia of one of the few areas of mathematics where the contributions of even nonspecialists count

included in the proceedings volumes cover a wide range of topics from evolutionary computation to swarm intelligence from bio inspired computing to real world applications Machine learning and mathematical games supported by evolutionary algorithms as well as memetic agent oriented systems are also represented They all are the latest and best in natural computation The proceedings are composed of two volumes divided into nine thematic sections **Abstraction, Reformulation, and Approximation** Berthe Y. Choueiry, Toby Walsh, 2003-06-26 This volume contains the proceedings of SARA 2000 the fourth Symposium on Abstraction Reformulations and Approximation SARA The conference was held at Horseshoe Bay Resort and Conference Club Lake LBJ Texas July 26 29 2000 just prior to the AAAI 2000 conference in Austin Previous SARA conferences took place at Jackson Hole in Wyoming 1994 Ville d Est erel in Quebec 1995 and Asilomar in California 1998 The symposium grew out of a series of workshops on abstraction approximation and reformulation that had taken place alongside AAAI since 1989 This year s symposium was actually scheduled to take place at Lago Vista Clubs Resort on Lake Travis but due to the resort s failure to pay taxes the conference had to be moved late in the day This mischance engendered eleventh hour reformulations abstractions and resource re allocations of its own Such are the perils of organizing a conference This is the first SARA for which the proceedings have been published in the LNAI series of Springer Verlag We hope that this is a reflection of the increased maturity of the field and that the increased visibility brought by the publication of this volume will help the discipline grow even further Abstractions reformulations and approximations have found applications in a variety of disciplines and problems including automatic programming constraint satisfaction design diagnosis machine learning planning qualitative reasoning scheduling resource allocation and theorem proving The papers in this volume capture a cross section of these application domains
