That testimony underscores the success of the authors' approach which combines the best elements of reform with the most reliable aspects of mainstream calculus teaching resulting in a motivating challenging book. Smith Minton also provide exceptional reality based applications that appeal to students' interests and demonstrate the elegance of math in the world around us. New features include: A new organization placing all transcendental functions early in the book and consolidating the introduction to L'Hôpital's Rule in a single section. More concisely written explanations in every chapter. Many new exercises for a total of 7 000 throughout the book that require additional rigor not found in the 2nd Edition. New exploratory exercises in every section that challenge students to synthesize key concepts to solve intriguing projects. New commentaries Beyond Formulas that encourage students to think mathematically beyond the procedures they learn. New counterpoints to the historical notes Today in Mathematics that stress the contemporary dynamism of mathematical research and applications connecting past contributions to the present. An enhanced discussion of differential equations and additional applications of vector calculus.

Minton, 1993. Focusing on how the TI 81 and the TI 85 two graphing calculators are designed to aid in the understanding of calculus, this book concentrates on the discovery of relationships and experimenting rather than on computational details. Differences between the two calculators are pointed out where appropriate as the TI 85 is newer and developed especially for the calculus audience. By not emphasizing button pushing but concepts and the application of those concepts, a simple programme is built to improve skills. In addition, many programming notes are included throughout. **Student Solutions Manual for Stewart's Multivariable Calculus, Concepts and Contexts, Fourth Edition** James Stewart, 2009-04.
