Corporate Income Taxes under Pressure Ruud A. de Mooij, Mr. Alexander D Klemm, Ms. Victoria J Perry, 2021-02-26 The book describes the difficulties of the current international corporate income tax system It starts by describing its origins and how changes such as the development of multinational enterprises and digitalization have created fundamental problems not foreseen at its inception These include tax competition as governments try to attract tax bases through low tax rates or incentives and profit shifting as companies avoid tax by reporting profits in jurisdictions with lower tax rates The book then discusses solutions including both evolutionary changes to the current system and fundamental reform options It covers both reform efforts already under way for example under the Inclusive Framework at the OECD and potential radical reform ideas developed by academics

Biotechnological Advancements in Biomass to Bioenergy Biotransformation Manikant Tripathi, Sukhminderjit Kaur, 2025-07-31 This edited volume focusses on the advancements in the production technologies challenges and perspectives for converting wastes biomass to energy It discusses sustainable solutions to contemporary challenges of simultaneous bioenergy production and waste management One of the biggest

environmental concerns today is waste generation and management due to the growing population and industrial expansion. Hazardous chemicals from industrial processes, agriculture, and the medical sector result in high pollution levels contaminating water, air, and soil. This pollution poses a significant threat to the environment and human health. Advanced technologies using microorganisms, nanomaterials, and molecular approaches offer environmentally friendly solutions to these issues. Agro-wastes, including fruit and vegetable wastes, can be viable resources for green energy production, promoting greener and circular economic strategies. This book highlights advances in bioprocesses for a sustainable environment, energy production from waste, bioremoval of hazardous pollutants, meta-omics approaches, bio-based technologies for resource recovery, bioeconomy models, nano-biosensors, and bionanotechnology in waste site restoration. Readers will gain insights into recent sustainable progress and future applications of advanced biotechnological approaches to waste management. This book is highly recommended as reference literature for a diverse community of professionals, scientists, researchers, biotechnologists, environmentalists, industrialists, environmental biotechnologists, students, undergraduate and postgraduate, and innovators involved in developing strategies to address the challenges of current environmental issues.

Countering Tax Crime in the European Union Umut Turksen, 2021-03-25. This book seeks durable solutions for tax crime and is a great resource for the development of knowledge, policy, and law on tax crime. The book uniquely blends current practice with new approaches to countering tax crime. With insights from the EU-funded project PROTAX, which conducts advanced research on tax crimes, the book comparatively analyses the EU's tax crime measures and the Ten Global Principles (TGP) on fighting tax crime by the Organisation for Economic Cooperation and Development (OECD). The study critically examines how the TGP can serve as minimum standards for the EU to counter tax crime, such as tax evasion and tax fraud. The study also analyses how the anti-tax avoidance package can be graduated to fight tax crime in the EU. When escalated, the strengths of the EU tax crime measures and TGP can form a fortress in which criminal law can be empowered to mitigate tax crimes with greater effect. The book will be particularly useful for end-user stakeholders such as tax policy makers, LEAs, professional enablers, as well as academics and students interested in productive interaction between tax, criminal, and administrative laws.

The European Union and Direct Taxation Luca Cerioni, 2015-06-05

Within the European Union direct taxation is an area which often provokes controversy due to tensions between the tax sovereignty of the individual Member States and the desire for an integrated internal market This book offers a critical review of the legislative and case law developments in this area at the EU level and reviews the European Commission's proposed solutions in light of their concerns regarding the proper functioning of the EU's internal market Luca Cerioni set

out a series of benchmarks determined from the objectives expressed by the European Commission including the elimination of double taxation and double non taxation the simplification of cross border tax compliance the reduction of abusive forum shopping practices and general aggressive tax planning strategies legal certainty for all businesses and individuals carrying on activities and receiving income in more than one EU Member State Cerioni uses these benchmarks to ask which Directives and or rulings have left legal uncertainty and which have ended up creating or increasing the scope for aggressive tax planning The book puts forward a comprehensive solution for a new optimal regime relating to tax residence which would contribute to the EU project to the mutual benefit of Member States and taxpayers As a thorough and critical discussion of EU tax rules in force and of the European Court s case law in direct taxation this book will be of great use to academic researchers and students of EU law tax practitioners and policy makers at the EU and national level *Tiley's Revenue Law* Glen Loutzenhiser,2019-08-22 This is the ninth edition of John Tiley s major text on revenue law covering the UK tax system income tax capital gains tax and inheritance tax as well as incorporating sections dealing with corporation tax international and European tax savings and charities This new edition is fully revised and updated with the latest case law statutory and other developments including Finance Act 2019 The book is designed for law students taking the subject in the final year of their law degree or for more advanced courses and is intended to be of interest to all who enjoy tax law Its purpose is not only to provide an account of the rules but also to include citation of the relevant literature from legal periodicals and some discussion of or reference to the background material in terms of policy history or other countries tax systems Copy the URL below to read a 2021 supplement highlighting new developments since the book s publication in 2019 <https://www.bloomsbury.com/media/2v1ej5vw/tileys-revenue-law-supplement-2021.pdf> *Achieving food security and industrial development in Malawi* Aragie, Emerta,Pauw, Karl,Pernechele, Valentina,2016-07-12 Restrictions on exports of staples or cash crops are frequently imposed in developing countries to promote food security or industrial development goals By diverting production to the local market these policies aim to reduce prices and increase the supply of food or intermediate inputs to the benefit of consumers or downstream industrial users Although export restrictions reduce aggregate welfare they are attractive to policymakers Governments gain support when they are seen to keep consumer prices low likewise politicians are swayed by industrial lobbyists who promise increased value addition in exchange for access to cheaper inputs This study weighs in on the debate around the desirability of export restrictions by simulating the economy wide effects of Malawi s longstanding maize export ban as well as a proposed oilseed export levy intended to raise value addition in processing sectors Our results show that while export restrictions may have the desired outcome in the short run producers respond to weakening market prospects in the longer run by restricting supply often to the extent that the policies become self defeating Specifically maize export bans only benefit the urban non poor while poor farm households experience income losses and reduced maize consumption in the long run The oilseed export levy is equally ineffective Even when export tax revenues are used to

subsidize processors gains in industrial value addition are outweighed by declining agricultural value addition as production in the fledgling oilseed sector is effectively decimated The policy is further associated with welfare losses among rural households while urban non poor households benefit marginally The SAGE Encyclopedia of Economics and Society
