

SOLIDWORKS SIMULATION 2015 Black Book

Book covers:

FEA Fundamentals and theory, Static Analysis, Non-Linear Static Analysis, Non-Linear Dynamic Analysis, Linear Dynamic Analysis, Thermal Analysis, Frequency Analysis, Buckling Analysis, Fatigue Analysis, Drop Test, Pressure Vessel Design, Design Study

Resources available with the book:

- Free part files and tutorial files for students
- Exercise files and video tutorials on desired topics
- Project for download
- Free online training demo on CAD/CAM/CAE software

Proceedings of the 13th International Scientific Conference Eugeniusz Rusiński, Damian Pietrusiak, 2017-03-27 These proceedings of the 13th International Conference on Computer Aided Engineering present selected papers from the event which was held in Polanica Zdrój Poland from June 22 to 25 2016 The contributions are organized according to thematic sections on the design and manufacture of machines and technical systems durability prediction repairs and retrofitting of power equipment strength and thermodynamic analyses for power equipment design and calculation of various types of load carrying structures numerical methods for dimensioning materials handling and long distance transport equipment The conference and its proceedings offer a major interdisciplinary forum for researchers and engineers to present the most innovative studies and advances in this dynamic field

Proceedings of the 5th International Conference on Industrial Engineering (ICIE 2019) Andrey A. Radionov, Oleg A. Kravchenko, Victor I. Guzeev, Yuriy V. Rozhdestvenskiy, 2019-11-30 This book highlights recent findings in industrial manufacturing and mechanical engineering and provides an overview of the state of the art in these fields mainly in Russia and Eastern Europe A broad range of topics and issues in modern engineering are discussed including the dynamics of machines and working processes friction wear and lubrication in machines surface transport and technological machines manufacturing engineering of industrial facilities materials engineering metallurgy control systems and their industrial applications industrial mechatronics automation and robotics The book gathers selected papers presented at the 5th International Conference on Industrial Engineering ICIE held in Sochi Russia in March 2019 The authors are experts in various fields of engineering and all papers have been carefully reviewed Given its scope the book will be of interest to a wide readership including mechanical and production engineers lecturers in engineering disciplines and engineering graduates

Artificial Intelligence and Renewables Towards an Energy Transition Mustapha Hatti, 2020-12-17 This proceedings book emphasizes adopting artificial intelligence based and sustainable energy efficiency integrated with clear objectives to involve researchers students and specialists in their development and implementation adequately in achieving objectives The integration of artificial intelligence into renewable energetic systems would allow the rapid development of a knowledge based economy suitable to the energy transition while fully integrating the renewables into the global economy This is how artificial intelligence has hand in by conceptualizing this transition and above all by saving time The knowledge economy is valued within the smart cities which are fast becoming the favorite places where the energy transition will take place efficiently and intelligently by implementing integrated approaches to energy saving and energy

supply and integrated urban approaches that go beyond individual interventions in buildings or transport modes using information and communication technologies
