Next to Godliness Daniel Burnstein, 2024-03-18 To many Progressive Era reformers the extent of street cleanliness was an important gauge for determining whether a city was providing the conditions necessary for impoverished immigrants to attain a state of decency a level of individual well being and morality that would help ensure a healthy and orderly city Daniel Eli Burnstein's study examines prominent street sanitation issues in Progressive Era New York City ranging from garbage strikes to juvenile cleaning leagues to explore how middle class reformers amassed a cross class and cross ethnic base of support for social reform measures to a degree greater than in practically any other period of prosperity in U.S. history The struggle for enhanced civic sanitation serves as a window for viewing Progressive Era social reformers' attitudes particularly their emphasis on mutual obligations between the haves and have nots and their recognition of the role of negative social and physical conditions in influencing individual behaviors [Greening the City](#) Dorothee Brantz, Sonja Dümpelmann, 2011-06-24 The modern city is not only pavement and concrete Parks gardens trees and other plants are an integral part of the urban environment Often the focal points of social movements and political interests green spaces represent far more than simply an effort to balance the man made with the natural A city's history with and approach to its parks and gardens reveals much about its workings and the forces acting upon it Our green spaces offer a unique and valuable window on the history of city life The essays in *Greening the City* span over a century of urban history moving from fin de siècle Sofia to green efforts in urban Seattle The authors present a wide array of cases that speak to global concerns through the local and specific with topics that include green space planning in Barcelona and Mexico City the distinction between public and private nature in Los Angeles the ecological diversity of West Berlin and the historical and cultural significance of hybrid spaces designed for sports The essays collected here will make us think differently about how we study cities as well as how we live in them Contributors Dorothee Brantz Technische Universität Berlin Peter Clark University of Helsinki Lawrence Culver Utah State
