Information in the Marketplace for Financial Services Paul Latimer, Philipp Maume, 2014-11-14 This book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets. It is written by two authors who represent both the new world Australia and the old world Germany. The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa, Asia, the Middle East and South America. After every boom and bust, legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media. Little regard is paid to existing regulation or the lessons learned from earlier regulation. The result is the continuing enactment of redundant and overlapping disclosure laws. Since financial markets are often described as markets for information, the failure to ensure disclosure is at the heart of financial services regulation. This book argues that the solution to the failure of disclosure is a brief, easily understood, principles-based plain English safety net amendment to statute law such as you must keep the financial market fully informed, a measure that would support effective mandatory continuous disclosure of information to financial markets. This book examines the reasons for disclosure regulation and how the efficient operation of financial markets is dependent on disclosure. It examines the adequacy of common law and civil law concerning broker-client disclosure and concludes that industry licensing in itself fails to keep the market informed. While recognizing the failures of securities commissions to achieve good disclosure in financial markets, it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange. Coregulation builds on financial market self-regulation and is best described in the words of one-time SEC Chairman William O. Douglas who in the 1930s described it as a shotgun behind the door. **OECD Corporate Governance**

Factbook 2021 OECD, 2021-09-01 This 2021 edition of the OECD Corporate Governance Factbook offers a comprehensive account of how the G20 OECD Principles of Corporate Governance are implemented around the world. With comparative information across 50 jurisdictions including all OECD G20 and Financial Stability Board members, the Factbook supports informed policy making by providing up-to-date information on the ways in which different countries translate the Principles recommendations into their national legal and regulatory frameworks. Public and Private Enforcement of Securities Laws

Michael Legg, 2022-02-10 This book undertakes unique case studies including interviews with participants as well as empirical analysis of public and private enforcement of Australian securities laws addressing continuous disclosure. Enforcement of laws is crucial to effective regulation. Historically, enforcement was the province of a government regulator with significant discretion, public enforcement. However, more and more citizens are being expected to take action themselves, private enforcement. Consistent with regulatory pluralism, public and private enforcement exist in parallel with the capacity to both help and hinder each other and the achievement of the goals of enforcement in a range of areas of regulation. The rise of the shareholder class action in Australia, backed by litigation funding or lawyers, has given rise to enforcement overlapping with that of the government regulator, the Australian Securities and Investments Commission. The ramifications of

overlapping enforcement are explained based on detailed analysis The analysis is further bolstered by the regulator s approach to enforcement changing from a compliance orientation to a Why not litigate approach The analysis and ramifications of the Australian case studies involve matters of regulatory theory and practice that apply across jurisdictions The book will appeal to practitioners regulators and academics interested in regulatory policy and enforcement and the operation of regulators and class actions including their interaction

The Political Determinants of Corporate Governance in China Chenxia Shi, 2012-03-15 This book investigates the key factors shaping corporate governance in China and presents a sophisticated study of corporate governance in China from a comparative and historical perspective Drawing on extensive corporate governance literature this book articulates why path dependence theory is the most effective framework for interpreting the development path of Chinese corporate governance Chenxia Shi reviews the historical role of government in commercial development and regulation in dynastic China and in early corporate law making followed by an account of China's legal and economic development over the last three decades

This historical inquiry identifies government control as the key feature of economic and market regulation in China. In particular, this book canvasses the evolution of governance of State Owned Enterprises and listed companies, major corporate governance problems, regulatory challenges posed by China's increasing participation in economic globalization, and enforcement difficulties, particularly in relation to investor protection, directors' duties, and accountability. Ultimately, *Political Determinants of Corporate Governance in China* demonstrates that corporate governance in China is largely determined by political imperatives, and those political imperatives have been shaped and re-shaped in a historical process.
